ANECDOTES OF REYER

The Famous French Composer Was Blunt of Speecin.

HE HAD A CAUSTIC TONGUE.

His Biting Wit Was Lavishly Bestowed Upon Those Who Annoyed or Displeased Him-As an Officeholder He Was the Limit of Indifference.

Ernest Reyer, the famous French composer, had a biting wit and a caustic tongue. Fortune frowned on him at the beginning of his musical career. and his first opera, "Erostrate," was played only twice. This did not worry Reyer much, although, as he said to the manager, "I had hoped to see it played three times at least." "Erostrate" was rather meanly staged. In the first not the temple of Ephesus was supposed to fall and did not. "I suppose," said Reyer, "that they thought that if the play dropped hard enough the audience would excuse the temple!

At that time the manager of the opera was a man named Halanzier. who was no musician and whom Reyer disliked. Halanzier had a way of put renizing the composer which made his furious, and he took his revenge one evening in Brussels. "Sigurd," after having had some success in Paris, was played at the Theatre de la Monnaie in Brussels and achieved a triumph. After the first performance Reyer gave a supper, to which he invited Halanzier who was delighted when the composer after a speech in his honor, lifted his glass and said, "And now I wish to drink to Halanzier." Halanzier bowed and smiled, and Reyer, without moving a muscle, went on calmly and imperturbably-"to Halanzier, the one manager to whom I owe nothing."

Reyer was playing one of his compo sitions at a friend's house when a little girl-he hated children-commenced to cry and would not be comforted. "For pity's sake," cried Reyer furiously. "put that child on a chair and sit on her face, one of you!" The crying child became some fifteen years later Mine Rose Caron, the singer who helped Reyer to the pinnacle of fame.

It was Ernest Reyer who was the original perpetrator of the joke with reference to twins which has been ascribed to so many people. A friend of his had just become the father of two boys and had them brought in to the composer, "Charming," said Ernest Reyer nervously-"charming children, patting their cheeks gingerly with his gloved hand, "delightful children real-

ly. Which one are you going to keep?"
When he was appointed librarian to the Paris Opera he took his duties very easily and as a matter of fact searcely ever went to the opera house. He was fond of telling the story of his first visit to his office. He went to it one evening at dusk six years after he had been appointed. DESERONTO.

A meeting of the Desoronto Tennis Club was held on Thursday evening last in Colpe's block when the following officers were elected:—Messrs. G. W. Wright, Honorary President; Robert Whyte, B. A., President; R. J. S. Dewar, Vice-President; Walter Cronk, Secretary and Treasurer. The above officers form an executive and ground committee. The Secretary is to write a letter of thanks to the High School Board, for the use of the grounds and also to offer Sidney Druce the position of care-taker of the grounds.
Miss Tens Warren spent a few days with friends at Picton and Green Point.

James Gammon spent last week at Bancroft on business.

Mrs. James Gammon and Master Gor-don, spent a few days with relatives in

Belleville. Miss Birdie Schryver returned home to Napanee on Saturday after having spent a few weeks with Mrs. W. H. Mellow.

Mrs. Judson Krupp returned from Ottawa last week and is spending a few weeks with her parents, Mr. and Mrs. R. Cronk before returning home to Amyot.
Miss Gladys Thompson spent Sunday with friends in Picton.

The funeral of the late Mrs. Elgin Whit-marsh took place from her residence on Brant Street, Friday afternoon at 2 o'clock when a large number of friends and relatives gathered to pay their last respects to one who was so well liked. Mr. J. A. Shaver, B. A., of Kingston, conducted the service, he being the Minister of deceased while laboring here in the West End Mission in which she took averaging the service.

ion in which she took a great interest.
The remains were placed in Riverview
Cemetery, Napanee Thepall-bearers were
Messrs, James Sexemith, Lorenzo Werden, Messrs. James Sexsmith, Lorenzo Werden, J. F. Macfarlane, Joseph Thompson, Wiliam Bowers and William Perry. There-was a lovely wreath of flowers from the Royal Templars of which order she was a member. The relatives that attended the funeral from out of town were Mr. and Mrs. Joseph Whitmarsh, Morgan Whitmarsh and John Parks, of Napanee, Mrs. William Parks, of Watertown, and Mrs. George Butler, of Rochester.

The Presphereims have rented the manse

George Butler, of Rochester.

The Presbyterians have rented the manse to Mr. Griffith, of the Chemical Company.

Miss Annie Dalton has taken charge of the Chnrch of the Redeemer organ while Miss Lily Dalton is in Ottawa.

Miss May Vandervoot has returned home from a visit with relatives in Toronto and her sister, Mrs. Porter, of Welland.

W. J. McMicking was able to be out on Saturday.

Saturday.

Mrs. J. McAlpine and her mother, Mrs.

Anderson of Marysville, were in

Joseph Anderson, of Marysville, were in town on Saturday. There was a large market on Saturday. The spring vegetables are commencing to make their appearance, rhubarb, lettuce and green onions.

gloved hand, "delightful children really. Which one are you going to keep?

When he was appointed librarian to the Paris Opera he took his duties very easily and as a matter of fact scarcely ever went to the opera He was fond of telling the house. story of his first visit to his office. He went to it one evening at dusk six years after he had been appointed. He lost his way and wandered about up and down narrow passages and dark corridors until he ran up against a doorkeeper whom he had passed two or three times already. The man, distrusting the stranger, stopped him and said, "Who are you, and where are you going?" Reyer looked him up and down. "I am the librarian," he said haughtily, "and I am looking for the library!"

One day a young musician called on him with a warm letter of introduction from a mutual friend. Reyer received him and, wincing, asked him to play the two pieces which his friend had recommended. After the first one had been performed the pianist turned expectantly to the composer. "What do you think of that?" he asked. "I prefer the other one," said Reyer, and the young man left without playing it. When he was on the stairs the old composer leaned over the banisters and called to him. "Your future is assured, young man," he said. "You have nearly learned when to stop. But if you had let me off the first piece too"- And, chuckling, he went into his flat again.

Office a young lady sang him the grand air from "Sigurd" and sang it rather badly. "I was so frightened, cher maitre!" she said. "Not nearly as frightened as I was!" was the old man's answer.

On another occasion a lady said to him: "Oh, M. Reyer, when I hear the air of 'Doves' in 'Salammbo' I can positively see you writing it! I can you in your beautiful home in Provence, between the mountain and the sea, drawing inspiration from the sunshine of the south and"- Rever interrupted her. "There is something the matter with your eyesight, madame," he growled. "When I composed that air I was sitting on the top of an omnibus, smoking a pipe, and it was gaining in torrents!"

One more example. A lady who lodged opposite him in the Rue de la Tour d'Auvergne was an ex-pupil of the conservatory, and this, it seemed to her, was the chance of a lifetime The master could not help hearing her sing, and if he heard her he would be captivated and her future would be assured. So she opened her window and daily sang numbers from his "Salamm bo." In due course a messenger knocked at her door. "M. Reyer has heard you." he began, and the singer believed that all her dreams were coming true. "M. Reyer has heard you," the messenger continued, "and he sends his compliments and would esteem it a favor if you would close your windows when you are practicing!

You had better watch in the market place than slumber in the temple .-Maeterlinck.

NEWS NOTES

John Ostrander, a Hamilton cab driver, was sentenced to two months in gaol for overcharging a passenger.

overcharging a passenger.

Sparling Beach, the ten-year-old son of Mr. Beach, of Ottawa, had an eye burned out and the other injured, and his four-year-old sister also had her eyes burned in an explosion of lime. They were playing with a tomato can filled with lime, and wishing to see it boil, poured water into the can. They were both leaning over the can when the explosion occurred. The boy will probably lose his sight, while the girl will recover does not intend to drop the

The crown does not intend to drop the investigation of the Kinrade murder mystery, but what plan it intends to pursue in its future probing efforts, the attorney-general does not wish to discuss. It is thought probable that an officer of the government will be detailed to watch the case for some time and that a final attempt will be made time and that a final attempt will be made to discover the Miss Elliott, so much in evidence in Miss Florence Kinrade's story. It is said that the mysterious "Miss Elliott" was in daily communication with the Kinrades during the first half of April, that while at the hotel she kept to herself and had no visitors. She was out most of each day and often returned late at night!

A shocking accident occurred at an early hour, Saturday morning, at the home of George Farreil, a prominent farmer, resi-dent in Sophiasburgh, about ten miles from Picton, when his wife was burned to death. Picton, when his wife was burned to death. It seems that the unfortunate woman was asleep when a lamp by her bedside exploded and soon the bed was a sheet of flames, The woman was rescued from her awful plight by her son, who was alone in the house with her, and who rushed to his mother's bedside at her shrieks for help. Very soon afterwards, however, she passed was been body having hean tarribly horrower. very soon arterwards, nowever, she passed away, her body having been terribly burned. Mr. Farrell was in Picton spending the night, having gone to attend the funeral of a friend. He could not reach home before his wife had passed away. Mrs. Farrell was a woman of fifty years and a native of the county.

ERINSVILLE.

The death of Cornelius Lynch occurred at his home near here, on Monday, May at his home near here, on Monday, May 3rd. He was born in Ireland, sixty-six years ago, but lived in this locality about forty-five years. Mr. Lynch was in apparent good health, until a month previous to his death, when he received a serious injury from a fall. From that time he gradually declined, but his illness was not thought serious until he was seized with cardiac asthma. The funeral, which was largely attended, took place on Wednesday, to the Church of the Assumption nesday, to the Church of the Assumption. and thence to the Roman Catholic cemetery. Rev. Father Quinn, of Tweed, con-ducted the services, in the absence of Rev-Father Carey. The deceased leaves five children, Patrick, of Belleville, and Margaret, Estella, Nellie and James at home. He also leaves four sisters, Mrs. Bridget Doberty and Mrs. Ann Lynch, of Belleville; Mrs. Ellen Doyle, of Stoco; Mrs. Thomas Keegan, of Erinsville, and one brother, John Lynch, of Erinsville.

MANAN AVANONANA

Paint brushes, at Eaton's prices, at Wallace's Drug Store

Watertown, N. Y., May 0. - Determined to have his child at all cost, even though the wife and mother re-fused to abide with him in the little Canadian town, Herbert Clancy, living between Enterprise and Centreville, Ont., secured the boy from a Coffeen street home, in Watertown, on Thursday last, hustled him into a hack and drove away, only to be stopped later by Officer at the American corner by Officer Ratsley, after the wife had run frantically to the police with a story that her child was being abducted. Clancy was not arrested, after certain matters had been made clear; the child is sleeping at the Orphans' Home, while Clancy has returned home, satisfied that his child is in better hands than

olumbia slow. Clancy, at that time, explained his mission to the police, incidentally remarking that his wife was found of dancing. A search about town was ne, left dancing. A search about town was made. As the husband passed a music hall the sounds of a waltz greeted his ears. He thought there would be no k at the ears. He thought there would be no harm in glancing in. A moment later he saw his wife swinging by, in the arms of another man. Clancy made his weesence known and the wife gave all team her consent to return home, though she later changed her mind and reholiday.

she later changed her mind and remained here.
Clancy sent his wafe 810 at Easter time to buy a ticket home for herself and the boy, but the 810 went for other things. Finally Clancy determined to have the child, whether he had the mother or not. He came here Tuesday night. Wednesday he asked the police for aid, and was directed to secure the proper papers. Clancy, however, determined to take things in his own hands. He secured a hack. offis own hands. He secured a hack, drove to the place where the boy was being kept, as he claims, in squalor, and secured the chubby-faced lad and drove away. "Sylvia" lost no time in getting to the police station, and for a time there was a whirr of excitement, the whole incident settling itself after the child had been placed in the home,

Bears the Signature Chart Illithus

The Young Shift For Themselves as Soon as Hatched.

The real home of the boa constrictors is in the tropical countries. Mrs. Boa seeks a sandy place. When she has found it she coils herself into a great and almost flat corkscrew. Then by just two or three turns of her body she digs a shallow hole in the sand. This is her nest. In this hole she lays about twenty-four eggs. The eggs are about as large as those bantam chickens lay and are a dark cream color. They are oblong and more the shape of a pecan than of a hen's egg. The shell is not hard, like a hen's egg, but yields to the pressure of your finger, something like rubber. Having laid her eggs in the nest of

sand, the mother boa winds berself into a perfectly flat coll, like a round mat. This done, she gently pushes waves of sand upon the eggs until they are covered from four to six inches deep. Then she settles herself upon the top and stays there for nineteen days. At the end of this time a lot of little snakes may be seen pushing their way out from the nest and away into the world to get their own living. They don't show a bit of affection for their mother or for each other, but glide away, probably never to be together again. Is it any wonder, when they act so just after being hatched out, that bon constrictors never like anybody and never have anything to do with people if they can avoid it?

Each little snake measures from twelve to fourteen inches in length and is about as big around as a lead pencil. It is said that they eat nothing at all during the first six months of their lives or until they are old enough to catch and crush to death small animals and swallow them whole. The boa constrictor never bites-it has no poison fangs-but always kills by coiling about its victim and crushing it to death. Fully grown, the boa constrictor is thirty to forty feet long and as big around as the large part of a man's

NOTICE,

octore. Mrs. Clancy, who is known about town as "sylvia," is determined to remain in Watertown.

The affair is the outcome of a trip here on March 8th, when Clan y came to Watertown in search of his wife who left him two years ago, when she found the Canadian village a little too slow. Classical Canadian village a little too slow. accordingly.

GROWING BOYS AND GROWING GIRLS

Need br. Williams' Pink Pills to Give Them Health and Strength.

Growing boys as well as girls need such a tonic as Dr. Williams' Pink Pills to keep the blood rich, red and pure and give them health and strength. Mrs. Edward Koch, post...istress at Prince's Lodge, X. S., tells the great benefit her little xon has derived from the use of this world famous medicine. Mrs. Koch says :- 'My little son, Reginald, had been troubled with anaemia almost since birth. He was always a sickly looking child, with no energy and little or no appetite. His veins sliowed very plainly through his skin and he had sev-eral serious attacks of stomach and bowel trouble, and on one occasion his life was dispaired of by two doctors who were attending him. His little body was slowly wasting away until he was nothing more than a skeleton. He was peevish and fretful and a misery to himself. Having read and heard so much of Williams' Pink Pills I determined to try them in his case, and after giving them to him for a couple of months they certainly workfat and healthy looking; he has a hearty appetite, is able to play like other children, and is bright and energetic, instead of dull and listless as he used to be. Dr. Williams' Pink Pills have changed my puny, sickly child, into a rugged, hearty boy

Dr. Williams' Pink Pills cured this sickly boy because they went down to the root of the trouble in his blood. That is why they never fail. Bad blood is the cause of all common diseases like anaemia, (bloodlessness) eczema, paleness, headaches, indigestion, kidney trouble, neuralgia, rheumatism and the special ailments that only growing girls and womenfolk know. Dr. Williams' Pink Pills don't bother with mere symptoms, they cure diseases through the blood. They don't cure for a day-they cure to stay cured. Do not take any pills without the full name, "Dr. Williams" Pink Pills for Pale People," on the wrapper around each box Sold by all medicine dealers or by mail at 50 cents a box or six boxes for \$2.50 from the Dr. Williams Medicine Co., Brockville, Ont.

BELLS OF THIN TRON PLATES.

Curfew in Middle Ages-An Early Pearl of Rells.

There are several old bells in Scotland, Ireland and Wales; the oldest are often quaurangular, being made of thin iron plates which * have been hammered and riveted together. At the monastery of St. Gall in Switzerland the four sided bell of the Irish missionary St. Gall, who lived in the seventh century, is still preserved; but more ancient still is the bell of St. Patrick in Belfast, which is orna-mented with gold and gems and silver-filigree work, says the London Globe.

The curfew bell is that about which most has been written and said. It-has been thought that it was only used in England, but it

THE MYSTERIOUS KEY

OR. PLANNING FOR THE FUTURE.

CHAPTER I.

"Gerald-It cannot be true." "'It is true."

There was a ring of triumph and joy in the voice of the young man who spoke, and the sweet-faced woman thrilled at the tone of confidence with which the words were uttered.

"I cannot comprehend. It is all so strange. What a complication." "I have the proofs here," said said

Gerald Winchester, as he held up

the papers in his hand.

It was, indeed, a strange situation; the young man who, but a short time before, had been but a clerk in the office of the wealthy banker, Adam Brewster, now standing proudly, with the mystery of his birth cleared by the strange revelations that the ancient foot-stool had furnished, as the son and heir of the dead millionaire.

Lady Bromley, who had been chiefly instrumental in the discovery of the precious documents in present so-called Mrs. Adam Brewtheir strange hiding-place, gazed at ster. her protege with eyes kindling with

joy."
"Ah, Gerald!" she cried eagerly; let me see the papers. It seems almost incredible."

he said excitedly, as he "See!" handed a paper to the woman; "this is a certificate proving the marriage of Miriam Harris to Adam Brewster, in the year 18-, and here, dated a little less than a year afterward, is another to certify to the baptism of Gerald Winchester Brewster."

"Then-then you are not the son of Miss Winchester's brother, as you have always supposed!" said Lady Bromley, after she had carefully examined the papers which

he had given her.
"No, it seems not; at least, if
my surmises are correct," Gerald my surmises are correct, replied, but with a look of perplexthing seems terribly confused, as yet, and, possibly, I may have jumped at conclusions somewhat prematurely, but I hope not. You see, there was a lot of rubbish in that thing"—with a glance at the overturned cricket upon the floor. Perhaps I should not speak of it in that way; but, at any rate, it seemed like rubbish to me when I was looking it over; but, at the bottom, I came across a bulky envelope addressed to me in my aunt's hand. In it were these papers, and several sheets which she had filled, and which will doubtless explain everything."

"But who was Miriam Harris?" questioned her ladyship, still study-

ing the certificate

Gerald turned back to the table and gathered up a couple of other

papers lying there.
"Miriam Harris, according to these documents, was the only child of Martha Winchester, who married a certain Arthur Harris in 18--, some twenty-five years previous to the date of those slips that you have. She must have been a younger sister of Aunt Honor's, which would make the latter my great-

were his constant companion for some years, and that during that time you enjoyed his full confidence.

"Yes, indeed, from the depths of my soul I am grateful for those years of confidential companion-

ship; but, oh, nis whole life seems to have been enshrouded in mystery, as well as my own; there was his second marriage, and the dis-

covery that Allison was not his own

"Not his own child, Gerald!" repeated Lady Bromley, in surprise.
"No. I have not told you about that. I have not been able to talk very much about her, you know," he responded huskily; "but I will relate the whole story to you some time, after this puzzle is all solved." The details of the story of the death of the beautiful girl in the railroad accident were always haunting him. "Then there is that inexplicable story about the Ha!-

"Well-what?" quickly inquired her ladyship, as he broke off with a violent start, a strange look sweeping over his face.

breathlessly, the veins filling out that as the goal he was seeking. suddenly upon his forehead, a "Yes: those are my views exact-dusky red suffusing his face; "I will ly," said Gerald; "and his union

her, and, feeling almost exhausted, she sank into a chair to rest. and

she still retained.

Gerald was absent fully ten minutes, and when he returned he was

"There has been a vile plot at work! I said it! I knew it! And now I am more strongly convinced of it than ever!" he said, almost hoarsely, he was so excited. "See here!" he went on, pointing to an article in one of the papers; "this gives a full acount of that woman's claim upon Adam Brewster and his estate. It also gives the date of the certificate which she brought to prove her marriage to him, and being a braggart in assuming to be it corresponds exactly with that "a second David aching to slay it corresponds exactly with that upon the one you hold in your

hands.

"Then do you not see-oh! it is all so plain to me now!" Gerald about; and the man himself being son and the only heir to his great dead, and Allison also, the rest wealth."

Was comparatively easy for such and "Ah!" But what good will it do

thing else that stood in his path,"
the young man explained, "and I
was wondering how he might feel
if the situation was destined to be reversed."

Then he told her the little story about the beautiful rose, which Allison had playfully thrown at him on that lovely summer day — how John Hubbard had afterward purposely knocked it to the floor and ruthlessly set his heel upon it, and warned him that it was typical of

his own fate. "But I have it even now," he continued, opening a tiny locket that was attached to his watchthat was attached to his watchchain; 'I carefully gathered up
every leaf and petal, and, later
laid them incased in this, vowing
well r
laid them incased in this, vowing

Century, is still preserved; but more ancient still is the bell of St. Patrick in Belfast, which is orna-mented with gold and gems and silver filigree work, says the London Globe

The curfew bell is that about which most has been written and said. It has been thought that it was only used in England, but it was quite common on the Continent in the Middle Ages.

The ringing of bells by rope still very popular in England, especially in the country, where almost every hamlet, however small, has its church with its peal of bells, which are often remarkably well rung. The first real peal of bells in this country was sent by Pope Calixtus III. to King's College, Cambridge, and was for 300 years the largest peal in England. About the beginning of the year 1500 sets of eight bells were hung in a few of the large churches.

In the middle of the seventeenth century a man named White wrote a famous work on bells in which he introduced the system of numbering them 1, 2, 3, 4, etc., on slips of paper in different orders, according to the changes intended to be rung It is calculzed that to ring all the changes upon twenty-four bells at two strokes a second would take 117 billion years'

One of the most famous bells in the world is the first great bell of Moscow, which now stands in the middle of a square in that city and is used as a chapet. This belt was cast in 1736, but was in the earth for over a hundred years, being raised in 1836 by the Emperor Xicholas It is nearly twenty feet high, has a circumference of sixty feet, is two feet thick and weighs almost two bundred tons. The second Mosco & bell which is the largest bell in the world that is actually in use, weighs 125 tons. There are several hells extant which weigh ten tens and ever, of which him hen, the largest hell in England, weigh ng between thirteen and fourteet tens, is one. Big Ben is unfortunately cracked.

and gathered up a couple of other papers lying there.

'Miriam Harris, according to these documents, was the only child of Martha Winchester, who married a certain Arthur Harris in 18-, some twenty-five years previous to the date of those slips that you have. She must have been a younger sister of Aunt Honor's, which would make the latter my great-aunt instead of my father's sister, as I have always supposed her to be. This, took explains why she was so much older than seemed consistent, if she had been my own aunt. I have always known that my mother's name was Miriam Harris, but I supposed that she married a Winchester.

"Well, it is all very, very range," thoughtfully observed strauge. Lady Bromley, but I wonder why the knowledge of it has been kept from you! Why, if you are Adam Brewster's son, were you not under your father's care to profit by the advantage and position which he could have given you, instead being committed to the care of Miss Winchester, to be reared in such chscurity?

'That is a mystery to me as yet,' replied Gerald, flushing sensitively; but I presume that Aunt Honor's letter will explain the matter. "Oh." he continued, with a pathe-'why tic yearning in his voice, "why could it not have been? It seems cruel! Cruel! And now I can understand why I was so peculiarly drawn to him! I often used to say to myself, when we were working together in his office: 'Ah! if I could only have had such a father, how proud and happy I should have been." He, too, was and of me, in a way, and he trusted me instinctively from the first; he once told me that he 'would stake his fortune upon my faithfulness and integrity.' I can now understand why we were so drawn to each other -it was the tie of blood, of kinship, struggling for expression, for recognition," he continued, a note of exultation in his tones.

He was trembling visibly, and his companion saw that it was with his self-control.

"What did I tell you, Gerald?" what did I tell you, Gerald I begin to work for lay own interests she said, with a roguish smile, to change the tenor of his thoughts. ton, of course; he will know inwas I not, after all, a true prophetess about the ford of high dechange for me— Ha, ha!" he

Well, in a certain sense, you were," he said, with an answering the past, smile, "for although Mr. Brewster Why was invested with no title, he was an honest, noble man, which means more to me than any appellation, his wonderful history, and did not however exalted, and I am very wish to lose a single point. proud of being the son of such a father; only there will always be a morning some three and a half sense of irreparable loss on ac-years ago, when this man vowed sense of irreparable loss on account of our mutual ignorance of the fact.

"Yes, that does seem too bad," returned his friend, with a regretful sigh; "there are so many things that are too bad in this queer world of ours. Of course, you cannot feel otherwise than gratified over this remarkable discovery; and if Mr. Brewster could have known that you were his son. I am sure he would have been as proud of the relationship as yourself. It will certainly be a great comfort to you, throughout the remainder of your life to remember that you

Ah! But what good will it do me now!" Gerald burst forth, with sudden pain and passion. "It will seem but a mockery-but the bitter irony of fate. Oh. Allison" Allison" What is anything in life to me now that I have lost you Lady Bromley could have wept

for him, for the anguish in his tone was like a sharp arrow in her own heart; but putting a strong curb upon herself, she arose and went to his side.

Put these rafely away, Gerald." he said, as she placed the certificates in his hand; "then read your aunt's letter you do not half-know our own history yet for, doubtss, it contains a great deal that will interest you, and, possibly, some other important information." (To be continued.)

COIN UNDER MAINMAST.

Ancient Custom Responsible for Finds in 6ld Ships.

Custom declares that a gold coin, or at the very least silver, shall be that other certificate, which the put under the mainmast of each new ship launched. The coin bears produced, a fraud-will it not? And the date of the year when the vessel is completed, a fact well known to collectors, who keep an eye on ships that are likely to be the depository of numismatic prizes, says Pearson's Weekly.

Thus at Liverpool some years back a derelict Yankee schooner, bought for a song, yielded an 1501 dollar, the rarest and most eagerly sought after of all American coins. It sold readily for £1,500 (86,000), and would be worth today at least double that sum, for it was in perfect preservation, having rested in its cotton wool wad beneath the hollow "stepping" of covery of to-day. I shall at once the mast since the day it was first placed in position

Its recovery was the result of foresight and business enterprise, combined, of course, with special knowledge. A man passing the worthless hulk on the day of the sale noticed the date, 1804, on her stern and rightly guessed that she might likely be the bearer of a dollar of that year.

In the same way have been preserved and recovered many of the ancient silver Scottish pennies known as doits, which were so tiny that twelve of them were barely equal in value to the penny ster-The old Scottish shipbuildling. ers of the days when these coins were in circulation used, with characteristic national thriftiness, to put one of them beneath each mast of a they "stepped," in preference to make the more valuable groat.

Owing to their small size, however, combined with their well nigh infinitesimal value regarded simply as money, most doits that were in circulation were speedily lost, leaving those that had been placed beneath the masts to become from the collector's point of view of extreme value.

WHAT DODD'S KIDNEY PILLS DID FOR HIRAM BROWN.

Cured His Aches and Pains and Gave Him Restful Slumber -Known as the Old Folks' Friend.

East Mapleton, Cumberland Co., N. S., May 10 (Special).—Though well past the alloted span of lite Mr. Hiram Brown of this place is still one of the grandest sights in life, a hale and hearty old gentle-And like many another man. Canadian veteran he gives Dodd's Kidney Pills the credit for his abundant health.

"I am seventy-two years of age, Mr. Brown said in an interview, "and I want to say that Dodd's Kidney Pills cured me of Gravel and Kidney Trouble. I was trouthat bled with Backache, Headache and a his Dizziness, Cramps in the Museles rewd and Stiffness of ...e Joints. sleep was broken and at times my limbs would swell.

But "But since taking Dodd's Kid-you ney Pills, all these troubles have from gone. I consider Dodd's Kidney it he Pills a wonderful medicine.'

The aged man or woman who has healthy Kidneys can afford to laugn at the ills of life. For healthy Kidneys keep the blood pure and she ensure good restful sleep. Dodd's arry-Kidney Pills always make healthy Kidneys. That is why they are of their value, known as the Old Folks' Best. it to Friend.

HER APOLOGY.

Little Lester was trying to fix a k of broken toy when five-year-old g no Beatrice came into the room and his said: "I am older than you. You are too little to do much of anyand thing. Let me fix it.

ying Her papa told her it was not kind lying

to speak that way, and to ask her

brother to excuse her.

Throwing her arms around his neck she said, "Oh, Lester, please excuse me but you see it was just this way-I had to be born first.

HER INTENTIO.

Miss Meanley-It may not be your intention to offend, but doesn't it occur to you that your treatment of me is rather calculated to make us bad friends?

Miss Cutting (coolly)-No: I had the hope that it would make us good enemies.

PLAGUE IN INDIA.

The plague in India first made the disease during the last ten years sale. has wrought havoe, but at this time the mortality is one per day. The health department of the city is doing its utmost to keep down the disease. To this end about 10,000 rats are being killed each week.

__ P_4__ - POOR CONSOLATION

"I feel discouraged," said the young M.D., whose practice was I suppose, doesn't amount to much not enough to keep him in practice. Yet 'Cheer up, my boy." rejoined the

BAFFLED BY BILLIONS

What is a billion? Can you conceive it? "Oh, yes!" you reply. you reply. "A billion is a million times a million. I can conceive it easily." Well, granted-for the sake of argument-that you can conceive it, can you count it? No! No man is able to count it. You may be able to count, say, 160 to 170 a minute; but let us suppose that you go up as high as 200 a minute hour after hour. At that rate, you would count 12,000 an hour, 288,000 a day, and 105,120,000 in a year. To count a billion would thus require a person to count 200 a minute for over 9,512 years!

NO ROOM FOR ARGUMENT.

"Yes," said the young wife proudly, "father always gives something expensive when he makes presents.

"So I discovered when he gave you away," rejoined the young husband.

And with a large, open-faced sigh he continued to audit the monthly bill of his alleged better half.

A Cure for Rheumatism .- A painful and persistent form of rheumatism is caused by impurities in the blood, the result of defective action of the liver and kidneys. The blood becomes tainted by the introduction of uric acid, which causes much pain in the tissues and in the joints. Parmelee's Vegetable Pills are known to have effected many remarkable cures, and their use is strongly recommended. A trial of them will convince anyone

A BAD MISTAKE.

"I made a terrible mistake yes-

"What was that?"

"I inadvertently asked Green how his baby was getting on, and he kept me an hour and a half answerthe question."

FOR RHEUMATISM—It is not necessary to go to Hot Sphing). Just use "The D. & L." Mentho Physics and results will be satisfactory. 25c at druggists. Davis & Lawrence Company, manu-facturers.

It is estimated that the population of the British Empire is 420,-000,000, of whom 348,000,000 are native races.

Some men seem to be as anxious to separate you from your time as others are to separate you from your money.

There can be a difference of opinion on most subjects, but there is only one opinion as to the reliability of Mother Graves' Worm Exterminator. It is safe, sure and effectua!

Canadian Wheat Best

Among cereals that are commonly used for human food, such as rice, corn, oats, barley, etc., there are none to compare with the whole wheat. Canadian wheat thoroughly cooked and taken with milk is a perfect food for the human system. Bread and milk make a good food, but usually bread is not cooked enough to get the best results. By chemical analysis there is found a great difference between the bread crumb and bread crust. Owing to the action of heat the bread crust contains about one-third less moisture than the crumb; six times more fat; 40 per cent. more proteid; twice the quantity of soluble matter; 60 per cent. more maltose and three times more dextrine, all due to heat action.

Orange Meat (which contains the whole wheat) is so prepared that every ounce will be affected like the bread crust. No kitchen with ordinary apparatus can produce this effect.

To persistent users of Orange Meat a large reward is offered. See their private postcard enclosed in every package of Orange Meat detailing particulars of how to win a cash prize of seven hundred dollars or a life annuity of fifty-two dollars.

If you enter this contest, send post card to Orange Meat, Kingston, giving full name and address, and mention the paper in which you saw this advertisement

Fashion Hints.

FANCIES AND FANCIES.

Heels are higher on the street

Buttons grow larger and dressier day by day.

Long lace veils will be used to

drape the hats. Among the new lingerie are the princes chemises.

For trimming the lingerie frocks Irish crochet takes the lead.

Many of the attractive trimmings show a touch of gold or silver.

Some of the new lingerie have slight touches of colored embroid-

No matter where the frock fastens the skirt and bodice are together.

Fringe of every description is to be worn a great deal upon the new

Lace is much used. In many cases almost half the gown will be of lace. Stockings should correspond with the belt, parasol, or other accessories.

So far as lines of coats or dresses are concerned, there is little passen change.

In the most stylish of the spring shoes the wide ribbon will be used

The separate coat will have a greater vogue this summer than it has for years.

Stockings match every variety of prizes shoe and all the more fashionable of intr

of the dress shades Fruits are becoming as popular

as flowers, and the vogue of the grape is noticeable also. The cotton materials have been

pushed somewhat into the background for the present by the new silks and serges.

Black has held a conspicuous place in the wordrobe of Mme. Mode. As summer advances, gray or mauve takes its place.

Foremost among the bags is the bronze bag, which comes in logically enough with the craze for bronze shoes and bronze belts.

Crepy weaves are growing in avor. They have appeared not only in cotton and lisle threads but from t have extended to wools ad silks.

Two of the prettiest shades of millinery are argont, a demurely soft silver, and alezan, a chestnut brown with a suspicion of pink in

Colored sash ribbons and gauze and tinsel ribbons are to be reckoned with as an important and not inexpensive item of the summer wardrobe.

Many of the shirtwaists this summer will be made without even so much as a collar band so the soft puritan collar of lingerie can be put around.

In the dainty tints there comes flannel weave of silk and wool blend that makes up the loveliest waists of Can and negligees for early summer use.

The high turndown linen or lace collar is still worn, but it is not the latest. The popular collar now is the low Dutch collar, so charmingly girlish, but so trying to older women.

The revival of ribbon trimming

has also been cured by radium.
In addition to the rays, use has been made experimentally of the "emanation." It has been collected on a suitable surface and then dissolved in water; and the solution injected into a mouse has apparently cured a cancerous tumor of the intestine.

Other wonderful effects have been obtained by radium, but it also often fails, and until it is known why it cures in one case and fails. to cure, or even does harm, in another aparently similar case, its employment must be regarded as

experimental.
The X-rays have been found less curative than they were at first thought to be, and in order that disappointment may be prevented, too much must not be expected from radium.—Youths Companion.

TREATMENT OF THE EYES.

Avoid reading in a poor light.

The light should be sufficient in quality and steady. It is hard on the eyes to read in a shifting light, such as often occurs in cars. Care should be taken to hold the book steady in the hands, so that the Aloysius Guerin Was Sentenced at vibration of the car will not be trans aitted to it.

and now far

B. C. RANCHES FIRESWEPT.

Settlers are Forced to Flee for Their Lives.

A despatch from Kamloops, B. C., says: Hundreds of thousands of dollars in property have been destroyed and scores of ranchers forced to flee for their lives as the result of a disastrous bush fire that swept the country from Notch Hill as far east as Three Valley and south from Sicamous as far as Vernon. Among the losses are two large sawmills, the Carlin Mill, \$75,000, and the Carrigan Mill. on Salmon River, \$35,000. Several mill hands had to flee for their Eves. Three large bush fires have been burning for several days and a gale soon brought them into contact. In Mara District the loss will be heaviest, for scores of ranch properties are completely devastated. On the main line of the C.P.R. fences and telegraph lines are destroyed for nearly twenty miles. West of Kamloops wires are down that destructive fires are still burning in Spallumcheen Valley, near

STRIKE AT OWEN SOUND.

C. P. R. Dockmen so Decide by a Large Majority.

A despatch from Owen Sound ays: The result of a ballot of the striking Canadian Pacific Railway through freight men taken on Sunday, was an almost unanimous de cision to continue the strike and reject the offer made on Saturday night by the company of a scale of 16 cents an hour for day work and 18 cents an hour for Sunday and might work. The suggestion of some of the leaders that the men would accept this offer was turned down on Saturday night at a meeting in Victoria Park and again at a meeting in the Town Hall, where a ballot showed 115 against and 15 for the acceptance of the offer.

ROYAL CHIEF TO SIX NATIONS.

Letter from Prince of Wales Joyously Acclaimed.

A despatch from Brantford says Three rousing war whoops marked the conclusion of the reading of a Dr. F long letter from the Prince of Wales to at to the Six Nation Indians in coun- the ci cil at Ohsweken on Tuesday. The Prince thanked the chiefs for electing him to the Turtle Clan, and expressed the belief that should the occasion arise the Six Nations would be found worthy of their glorious traditions in the field. death

Two Children.

A despatch from Morrisburg says: While Eleanor Moorhouse, aged 10 years, was attempting on Saturday evening to get into a punt in charge of Harold Murphy, 15 years old, in order to cross to her home on the other side of the canal, she slipped into the water, pulling young Murphy in with her. The lad seized the girl, and managing to grasp a projecting stone in the canal wall, called for help. Mr. Fred H. Broder who was on the opposite side, 200 feet away, heard the cries, and, without stopping to remove his coat, leaped into the water and swam across. He was nearly exhausted when he reached the drift other side of the canal, she slipped hausted when he reached the drift ing punt, but succeeded in clambering in, and then he rescued the two children from their dangerous posi

KIDNAPPERS SENTENCED.

Life for Boyle, 25 Years for Wife-Attempt at Suicide.

A despatch from Mercer, Penn. says: James Boyle was sentenced on Monday to life imprisonment in the Western Penitentiary at Pitts-burg for the kidnapping of "Billy" Whitla. Mrs. Boyle, indicated as Mary Doe, received a sentence of twenty-five years, with a fine of \$5,000 and the costs of the prosecution. Both collapsed in court. That the threats of a double suicide made by Mrs. Boyle on Sunday were not mere idle words was shown on Monday, when it became known that a razor which had been secreted in his clothes was taken from Boyle, and that Mrs. Boyle had taken morphine between midnight and daylight. She was rendered partly unconscious during the night.

TWO BROTHERS DROWNED.

The River Bank Caved in Carrying Them With It.

A despatch from Ottawa says: Two young Ottawa boys, Napoleon and Daniel Valiquette, brothers, were drowned in the Ottawa River on Monday afternoon at the foot of Kent street, within a few hundred yards of the Parliament building. They were standing on the edge of high embankment overlooking the river when a large section of earth loosened by recent rains, gave way and slid into the river, carrying both lads, along with another boy named Oscar Major, into the swift-flowing river beneath. The latter managed to grab a tree at the bottom of the embankment tempt in August to reach the north and saved himself. The other two pole in a dirigible balloon.

Seeing their plight, the boys rushed out and brought the lads in. Merrigold only lived a short time, and it was only by the utmost effort by the doctors that Knight's life was saved. The tree under which they were standing was not struck. dead lad was a son of Robt. Merrigold, of Hamilton, formerly of

BIRD AS BIG AS A MAN.

Captured After a Fierce Fight Near Atlantic City.

A despatch from Atlantic City, N. J., says: Attacked by an immense bird of unknown species, supposed to be a member of the pelican family, Capt. Geo. Doughty fought the battle of his life shortly before daylight on Wednesday morning, before he was able to vanquish his feathered antagonist, which he knocked down with an oar. After confirmation of his weird tale Capt. Doughty on his return to this city showed arms pinched black and blue, and shredded clothing, along with the strange bird, which he trussed up and brought home in his coat. Local scientists who have viewed the feathered monster are still uncertain of its species. weighs over 100 pounds, and stands almost as tall as a man. According to the story told by Doughty, he was sculling his boat along in front of Rum Point, near Brigantine, shortly before daylight on Wednesday morning, and in a dense fog, when he was attacked by the bird. The bird is still alive, and will be presented to some collection if it survives the beating it received during the battle.

DROWNED AT GALT.

and Upset.

A despatch from Galt says: The first drowning accident of the season in the Grand River occurred about 2 o'clock on Friday afternoon. The victim was Carl Stahlschmidt, son of Mr. W. Stahlschmidt of Preston. Clarence Goodfellow, son of Mr. B. A despatch from Winnipeg says:

Excellent progress has been with seeding throughout the west during the past week, according to the crop report issued by the Cana dian Northern Railway on day. On Portage Plains about H. Goodfellow, Galt, had a narrow lescape. All went well until just back of the collegiate, when the west canoe capsized. Goodfellow was able to swim, but Stahlschmidt was not. OTTAWA NEWS.

The week saw two items of interest

discussed in the house, one being the

concluding debate on the Grand Trunk

Pacific loan, and the other a discuss-

lon on a certain report made by a com-

mission appointed by the New Bruns-

wick Government touching matters

concerning the Central Railway affairs

Grand Trunk Pacific Loan.

Opopsition repeated the arguments

which were advanced when the scheme

to build a National Transcontinental

Railway was first presented to the House, concluding by several amend-ments which were so impractical that

they were rejected by an overwhelming

vote. A strange thing was that when

the main motion was put not a Conser-

vative voted against it. Although

days had been consumed in presenting

objection to the loan, when the time

came to vote on it, the vote was unani-

mously in favor of the Government's

Sir Wilfrid's Patriotic Speech.

Sir Wilfrid Laurier made an im-

counted for the result, it undoubtedly

had great influence upon the decision

The contention had been made by

several Conservative speakers that the

portion of road between Winnipeg and

Moneton was to pass through an un

against this Sir Wilfrid quoted from a

report supplied by the engineers of the

Railway Commission This report with some particularity, gave infor-

mation of the very opposite character.

Conservatives Hostility.

The Prime Minister first alluded to

the attitude of the Opposition as being

one of consistent antagonism to the Grand Trunk Pacific project. From

the inception of the enterprise, said he,

the Opposition has been blindly hostile

Two elections had not opened their eyes. The Prime Minister recalled

how it had been stated in 1903, that

measure, and again in 1908 how that

an outraged electorate would tear the

project to pieces when it was found

that the work was costing more than

originally contemplated. However, after the new calculations had been

placed before the people, the electors gave an emphatic, decided answer, "go

on and finish the work." Such verdict

should convince the Conservatives that

the people believe the road a political

THE BEST FLOUR. DAFOE'S NONESUCH DAFOE'S MANITOBA PATENT

By numerous tests by the best Bakers the above mentioned grades have been proven to be the best Flours in the market.

When buying Flour ask for Dafoe's, and patronize your home mill, thereby producing Bran and Shorts that you can purchase cheaper than the product of the Western mills, which has to be transported thousands of miles at great expense, and usualty, whon

it reaches you, of inferior quality.

The grocer complains if the farmer or the mechanic sends to Toronto or to outside points for an article he can get at the home store ust as good, but he does not hesitate to buy Flour from mills hundreds of miles away, and sell you an inferior Flour for more money than you can pur chase the home product for, every bag of which is guaranteed.

Exposed a Fallacy, Referring to the oft-repeated state-

100,000,000 of wheat, and that was

only a portion of the crop.
Sir Wilfrid ventured to predict that the time would come when the Opposition skeptics would see the error of their way.

Speaking of mineral possibilities. Sir Wilfrid said since 1903, when the grand project of building a transcontinental was introduced which should pass worth of the Laurentian mountains, there has been in these very mountains at Gow Ganda and at Cobalt, a discovery of minerals the like of which has never been found in any other part of the world.

Advantages Gained.

One of the reasons given in 1903 for building the Grand Trunk Pacific was to be independent of the bonding privileges which at present makes us de-pendent upon the United States. While nothing had happened to mar the pleasant relations in this regard, it was well to guard against the danger always existing although not always imminent. While it was imways imminent. portant to provide for defence on land and sea, it was also important to protect and secure our commercial independence.

The Prime Minister made it very clear that the loan to the company did not modify in any manner the original contract. He showed the fallacy of putting on the market the common stock of the company as a means of raising money, and reminded the House that the loan, excepting in amount was on all fours with that granted to the Canadian Pacific Company in 1834.

The Grand Trunk Pacific, said the Premier, has been build upon a different plan from other roads. Usually they are chiefly built with heavy grades, interior curves wooden trestles and light rails, and afterwards the road is built and rebuilt. The Grand Trunk Pacific is building a solid, permanent road at the first, so that it will not have to be built several times over, as was the case with the Canadian Pacific Railway. Sir Wilfrid gave the average cost per mile of the leading railroads of the United States, and by comparison proved that they were more expensive than the Grand Trunk Pacific.

Other Big Enterprises.

Sir Wilfrid also presented figures to show that there was a great difference in the original estimate of cost and ultimate cost of great public works He instanced the Suez canal estimated to cost \$20,000,000, but which ultimately cost \$80,000,000. Then there was the bridge over the Firth of Forth, estimated cost \$6,400,000, cost when completed \$10.000,000. The bridge over the East river, New York, cost 47 1-2 per cent. more than the original estimate. The Victoria bridge at Montreal, built by Robert Stevenson cost 35 per cent, more than the original estimate.

Tories Supported Bill at Last.

Sir Wilfrid's speech carried great weight with members of the House, and after several amendments had been presented and voted down, the Opposition in a solid body voted in favor of the loan to the Grand Trunk Pacific. When Mr. Borden was asked if the division went the same as the amoudments, he answered :- There were no

Mr. Pugsley Foors Detractors.

The incident of the week which probuild a national road through Canavoked the most interest was the atdian territory from the Atlantic to the tempt to discredit Hon. Wm. Pugsley, Minister of Public Works, in consequence of a commission appointed by the government of New Brunswick having made reflections upon him in a report dealing with the Central Railway of New Brunswick.

mate large profits, with absolute cer-

tainty of no personal loss. The explanation given of this is that the figure should be \$43,000 not \$430,000; that the error was typographical. It is worthy of notice that the commissioners did not correct this error, the original figures were allowed to go to the country, and do their part towards ruining the reputation of a public man, and the correction was made by Mr. Pugsley amid cheers.

Reckless and Contradictory.

Then again the report says: 'So much of the facts are given to show absolute want of bookeeping." A little later in the report these words appear. "Mr. Shannon had the benefit of Mr. Evans' statement, the books of the James Barnes Construction Company," proving that the report was wild and reckless. Then again, while in one place in the report it says there was an absolute want of bookkeeping, in another place they say: "Books of account in connection with the operation of the railway were kept in the company's office at Norton. These books, besides showing the revenue and operating expenses, show the amounts expended for betterments outside the cost of construction of the fifteen mile section and branches, and were well kept."

This report says first, that no books were kept, which accounts for the jumble into which affairs got, and secondly, that books were kept showing all outgoings and incomings, and they were well kept. It is upon a report such as this that a reputation is sought to be biasted.

dian territory from the Atlantic to the Pacific. To bind the East, the cradle of the nation, with the West, the hope of the nation, by means of a commer cial tie.

Exposed a Fallacy,

Referring to the oft-repeated statements made by the Opposition that the and north of the St. Lawrence was barren, uninviting and unfit for settle-ment, the Prime Minister said such had always been the contention of the Opposition, but against that he read a report from the Railway Commission which demonstrated that the railway would, in the Northern parts of Onvario and Quebec, pass through millions of acres of fertile lands, well timbered and well watered.

History Repeats Itself.

In this connection Sir Wilfrid re ferred to the fact that Sully, first Minister of Henry IV, of France, one of the ablest men of his generation, gave it as his opinion that 'the continent of America was unfit for white North men. This would include Quebec, Ontario, the Maritime Provinces, New York, Illinois and the Northern tier of the American union.

Similar objections were urged in 1852 against the building of the Grand Trunk. One critic said he was violently opposed to the extension of the railway from Toronto to Sarnia because there would be no wheat for export from that section. Another objected to the extension to Georgian Bay because the country was an impenetrable and barren deserts As late as 1869 Archbishop Tache, who for twenty years had roamed from the Lake of the Woods to the Rocky Mountains, and from the American boundary to Lake Athabasca, said that what are now the provinces of Manitoba, Saskatche wan and Alberta, were unfit for agriculture He gave it as his opinion over his own signature that the valley of the Red river, the valley of tie Saskatchewan and the valley of the Assiniboine never could produce wheat, yet last year these plains produced over

LSng grap

" Let the

tempt to discredit Hon. Wm. Pugsley, Minister of Public Works, in consequence of a commission appointed by the government of New Brunswick having made reflections upon him in a report dealing with the Central Railway of New Brunswick.

Without making a statement in any way prejudiced, but as a simple relation of a fact, patent to every member of the House, Mr. Pugsley, in a speech of four and a half hours, completely riddled the report, demonstrating by ample quotations that it discredited itself, was utterly unreliable and of a distinctly partisan character. It was contradictory, biased and false. Conclusions contained in the report were neither based on the evidence nor justi tied by it. When Mr. Pugsley conclud ed there was nothing of the report left but the cover, and even that came in for some criticism.

Interest a-c Inaccurate.

The Minister first called attention to the interest account, showing that by the figures given in the report the interest on two items alone was understated by \$5,000, and that, further, that no interest whatever is shown uj on the \$180,000 which was paid for the Central Railway, or upon the \$77,-000 of improvements, for a period of eighteen months, upon the loss in operating extending over a number of years. All of these were absolutely omitted from the account and state-ment of interest given in the report. In other words the commissioners left out a sum of \$60,000 properly chargeable to interest.

Mr. Pugsley pointed out instance after instance of inaccuracy in the report. He first called attention to the statement that a note for \$10,000 had been discounted in the People's Bank at Fredericton, marked F. B. T.; that the report says. "We could not trace what became of the proceeds."

These, said he, were the initials of a Senator Thompson, one of the most honorable men in the province, was assisting the enterprise by endorsing for the contractor, and the sug-gestion of grafting on his part, contained in the words of the report, were scandalous and untrue, because in the accounts of the construction company this very note is credited to the railway company.

Exceeded Their Powers.

While the powers of the commissioners were limited to 1901 they went back to 1890 to drag in the name of Hon. Mr. Blair, and to injure a political opponent they went back fourteen years, to 1887, to gratify their hatred.

Proceeding to show the reckless character of the report, Mr. Pugsley quoted that the moort says : "It pears conclusively from the evidence that the whole \$250,000 par value of these 3 per cent bonds had been guaranteed and delivered to the company up to 6 August, 1903. This statement is false, and the evidence shows that only \$138,000 were guaranteed, a difference of \$111,500 Mr. Pugsley proved by reading the report that it contained two utterly different statements on different pages, showing that the report was either drawn up by different people, and that the different parts of it had not been compared, or that, the statements made in the report were utterly reckless and quite unreli-

Blamed the Printer Again.

Mr. Pugsley then showed another glaring error in the report. Speaking of the company's stock, the report says: "Responsible and respectable men from various parts of the province were obtained to lend their names as directors; and from the fact that \$430,000 of the total \$500,000 authorized capital was to be distributed as founders' shares, we conclude that the interested parties had visions of ulti-

This report says first, that no books ting a were kept, which accounts for the fairs of jumble into which affairs got, and detail t

secondly, that books were kept showing all outgoings and incomings, and they were well kept. It is upon a report such as this that a reputation is sought to be blasted.

Who Are the Commissioners.

Referring to the commissioners, Mr. Pugsley said he had "great respect for the bench, but if any gentleman should tell him that Judge Landry was specially selected for his great eminence in his profession, I should feel that be had little knowledge of the transaction of legal business in the province of New Brunswick, and but little knowledge of the leading counsel who ap pear before the various courts of the province. "Mr. McDougall, another commissioner was manager of a little branch of the Royal bank, and had been so for years. Mr. Powell was a Conservative politician and ex-candi-Judge Landry, said Mr. 1'ugsdate ley had coquetted with both political parties on the eve of a general election

to be a candidate for one of them. "This prevented his mind from settling down to that judical calm necessary to enable one to adorn the high position of a judge.'

How Did They Get It?

Although the report stated what amount of interest should be charged, Mr. Pugsley showed that in response to a question asked in the New Brunswick House, the Government had declined to bring down a return the ground of the time it would in-volve and the great expense attaching to it. How, then, said Mr. Pugsley, could these commissioners arrive at any accurate figures in this regard?

Put Them in a Hole.

The report says also that the cost of the road was excessive, that \$11,000 a mile was ample for this. In this connection Mr. Hazen, Conservative prem-

ier of New Brunswick, has been urging the Federal Government to increase the subsidy upon the ground that the road would cost \$21,000 per mile. All this in the face of the report of his own commission that the road should be built for \$11,000 per mile.

Dr. Pugsley selected at random through the report about twenty-five explicit statements of fact, and literally tore them to shreds. He proved by facts, figures, quotations from of-ficial documents that the commissioners had not been careful, but had made statements contrary to the evidence, and utterly at variance with the facts. He concluded by submitting a financial statement of the affairs of the company, which gave in detail the receipts and expenditures,

and disposed effectually of the suggestion that any money had been wrongfully applied. Amid cheers which shook the build-

RAW DRUGS.

Castor Oil Comes as Pretty Little Brown and Black Beans.

Upon going into a pharmacy and looking over the mysterious jars and bottles and boxes that line the shelves did you ever wonder where on earth all of the drugs came from and how they appeared before they were ground up and made into oils or dried or pul-verized or crystallized into queer shaped lumps? Each jar and box seems to hide some secret which you Immediately become curious to solve. How many different lands do they represent? And, after they leave the jars that hold them now, what are they made into?

Who, for example, would connect a great pile of dry, thin twigs, neatly tied into small bundles, with sarsa-parilla? These twigs are the creeping roots and rootlets of a prickly shrub that grows in Jamaica, and they tre worth from 10 to 50 cents a pound

Somewhat similar in appearance is tpecacuanha, which also comes to us in dry twigs, which are part of the trailing root of a plant found in the damp forests of Brazil.

These roots receive no preparation save drying before they are shipped off to the United States. They are packed in large sacks, and the workmen who open the bales must beware of breathing the pungent, irritating dust given off, which is productive of unpleasant results if incautiously inhaled.

Castor oil, too, is hard to recognize in the pretty little brown beans, spotted with black and with polished skins. that arrive in bags from India. They look far too attractive to suggest the much hated dose of our early days.

Aloes, the base of many nauseous medicines, may be seen in its crude form as a solid mass resembling brown sealing wax, packed in heavy wooden boxes, from which it is chipped out in flakes with a chisel and hammer.

It is of different qualities and prices, according to whether it comes from Arabia, Socotra or the West Indies, and may bring any sum from \$4 to \$45 per hundreweight. Aloes is the juice of the big fleshy leaves of the plant of that name. This juice is pressed or evaporated from the leaves and poured into chests or kegs in a semifluid state, hardening presently into a solid block. Not infrequently it is inclosed in the dry skins of monkeys and in this strange form brought to market.

One of the most interesting of drugs is opium, both on account of its awful potency and by reason of its great value. A case of opium, about 225 pounds, is worth \$400 roughly. The case is of rough deal lined with tin and contains a number of soft, dark lumps, like large handfuls of dough packed very closely together in a quantity of dry, chaffy seeds. The opium which reaches America

is of two qualities, one for medicine. the other for smoking, and comes from Persia and Asia Minor, China and India .- St. Louis Republic.

MONEY OF THE RICH.

Of More Use Foolishly Spent Than Hoarded or Lying Idle.

A great reservoir of water undistributed leaves men and women to perish of thirst and growing crops to parch and die. So also vaults bulging with stagnant money leave men and women to perish in abject poverty and ripened crops to rot within the fields and orchards that grew them. Therefore what happens to the dollars of the millionaire is a question of the first importance.

Those of us who believe in praying for material blessings will do well to

STEALING A SIGN.

That Was the Policeman's Charge, but It Was Not Sustained.

Stealthily the policeman stole out from behind the side door of the saloon and quickly pounced on some Cofumbla college boys who were carrying a long board sign that had hung over some tobacconist's shop. The youths protested against the officer's interference, but he told them that they would find it a hard job to turn little old New York into a college town, and off to the lockup they went, college boys, sign and all.

"What's the charge?" asked the sergeant as he looked out at the aggregation of the coming great men of learn-

"Stealing a sign," answered the cop as some of the boys bumped it into the station house, where it reposed against the wall.

"We did not steal it," spoke up one of the youths; "we only borrowed it."

The sergeant turned to the cop and told him to call up the owner and find out what the true state of the case was. The policeman read the sign slowly and then turned to the telephone book to look up the owner.
"Hello! Did you lose a sign?" And

the answer made the policeman scratch his head.

"What did he say?" asked the waiting sergeant. The reserves were beginning to grin, and the policeman ooked very uncomfortable.

"It is all right," he said, scowling at the youths. "The owner says they rented the sign for the night and are to return it tomorrow morning when he is ready to do business again."

A shout went up from the youths as they were ordered out of the station, and they took up their triumphal march and sought out some other unsuspecting cop to dupe, and far down the street came back their triumphal vell:

"C-o-l-u-m-b-i-a!"

The cop laughed to himself as he started out again on his beat, and a friend at his side asked him the cause of his merriment.

"The owner of the sign was mad all the way through and wanted me to hold the sign. He had rented it all right, but he said that was the third time he had been called out of bed tonight, for the boys had been pulled in in three other precincts, but as long as I was a goat for him I thought I would let the rah-rah boys have some more fun with some other cop and sent them on their way."-New York

AN UNSOCIABLE LOT.

What Mr. Thomas Thought of the Crowd In New York.

Mr. Thomas crammed a fresh stick of birch into his little stove and closed the door, which John Arnold had left ajar on his entrance. The tiny shoe shop thus became air tight. Then the proprietor replied to John's question of what he thought of New York.

"I can tell ye in 'mazing few words," he said. "It's considerable of a place. Lots doing an' splendid big buildings an' schools an' churches an' all that. They think they're some punkins too. An' I ain't saying that there ain't plenty of real smart ones there. Spite of all that, though, I call 'em kind o' ignorant, besides being cold in their manners.

"I want to know!" commented John, visibly impressed by this recital.

"I'll tell ye," continued Mr. Thomas. "Brother Tom's boy's office is down near the big Brooklyn bridge, and I used to go down there and set a good deal while my wife visited with his wife up in Harlem.

Garibaldi was once presented with a medal made of his own blood. The giver was Dr. Manini of Naples, who was well known as a petrifier and preserver of the human body. Dr. Manini in offering his gift to Garibaldi said that whenever the general looked at it it would brace him up for the last fight, and across the medal were engraved the words, "The Blood of Garibaldi Is Forever Red." The strange medal is preserved by the general's descendants.

An Eye to Business.

"Bigsbee is a terribly melodramatic fellow, isn't he? He said he'd drain his heart's blood for the woman he loved. Do you think he meant it?"

"Why, I guess so. Bigsbee is agent for a drain and sewer pipe concern."-Cleveland Plain Dealer.

All He Knew.

Officer (to recruit who has missed very shot)-Good heavens, man, where are your shots going? Recruit (tearfully)-I don't know, sir; they left here all right!-London Punch.

Habit is the deepest law of human prem- nature.-Carlyle.

crops to rot within the fields and orchards that grew them. Therefore what happens to the dollars of the millionaire is a question of the first importance.

Those of us who believe in praying for material blessings will do well to pray long and earnestly that rich wo men will never cease to buy \$100 hats and \$1,000 gowns, with diamonds and other lewels to match: that they will continue to give balls and teas and entertainments of the most expensive kind; that they will be recklessly ex trayagant in gewgaws and folderels of every description, because it will be good for us who depend upon an income drawn from the multitude of operations involved in producing, mer chandising and transporting all these gewgaws and other gimeracks that go to keep extravagance at a high pitch.

Let us hope that rich men's sons will continue to spend their fathers' money as foolishly as they are reputed to do -not because it will be good for them, but because it will be good to have the money poured into the wage earner's money channels.

Let us doubly hope that the rich men may be prospered in their money getting, because they will not let it lie Whatever their wives and children do not spend they put into stocks and bonds and thereby turn it into the wage earner's money channels. Let us be thankful, too, that neither the dollars of the rich nor the dollars of the poor are of any value save as they go into the wage channels of active circulation .- F. W. Hewes in Harper's Weekly.

In the Ark.

"Tradition has it that Noah's faithful dog was the last animal to board the ark."

"Yes. The hog was probably the first, so that he could grab an end seat."-Washington Star.

visibly impressed by this recital.

"I'll tell ye," continued Mr. Thomas. "Brother Tom's boy's office is down near the big Brooklyn bridge, and I used to go down there and set a good deal while my wife visited with his wife up in Harlem.

"When it come what they call rush hour I used to go down an' stand on the bridge an' watch 'em passing by, hundreds of 'em, on their way home, an' I got to feel real friendly an' to know lots of 'em by sight. But"-

Mr. Thomas paused impressively-"but, although I didn't miss an aft'noon whilst I was there, an' that was two weeks, nary one o' them men ever give me a single glance of recognition.

"It wa'n't my place to speak first, me being a stranger an' they home, so to speak. I wa'n't going to push myself; but, I tell ye what, John, two or three times I had to hold on to myself to keep from telling of 'em just what I thought of such onfriendly ways.

"'Why,' says I to Brother Tom's boy, 'how long do you s'pose one o' them would be at Tunkett Corners before we knew him well enough to nod to an' found out his name?" "-Youth's Companion.

Tongue Charms.

The tongues of animals have been and are still in some parts of the world favorite amulets. A tongue cut from a living fox is said to ward off disease of all kinds, but as the person carrying one will surely die if he happens to meet a fox at any crossroads the charm is seld on used. The tongue of the vulture placked out with iron and hung about a man's neck in a new cloth will bring him what he desires, and some East Indians believe that if they do not bite off the tip of the tongue of any wild animal they kill they will not have good luck in hunting .- London Tit-Bits.

VALL BUK SAVED HIS FAND! WHEN TORN BY TROLLEY ROPE

WORKING men and women throughout the Dominion find that Zam-Buk is the greatest boon they can have as a healer of accidental cuts, burns, and bruises, as well as skin diseases. Mr. H. G. Purchase, conductor on the Toronto Street Railway. tells how this great herbal balm benefited him when he met with his assident.

The trolley pole of his car slipped off the live wire, and the rope was caught in the standard. Purchase held on to the rope until his hand was pulled up to the top of the car. There it was held, and the rope, pulled through his the force of the moving car, fingers by the force of the moving car, tore and lacerated to a shocking extent three fingers, tearing several pieces of flesh complexity away. Zam-Buk was applied, and eased the pain very quickly. Writing to this effect, Mr.

rurenase says:—
"I had previously had experience of the healing power of Zam-Buk, and the way it see the sets and injuries. I, therefore, bound the fingers in Zam-Buk, and it was most gratifying the way in which this balm seethed the pain. Two

days after the accident the wounds were closed, and new skin was beginning to form over the top. Each day I dressed the wounds with Zam-Buk, and I am now back again at work with the hand as sound as ever. To look at it you would never know it had been terribly torn and lacerated. "I do not think there is anything to

equal Zam-Buk as a healer of skin injuries and diseases."

WHAT YOU SHOULD USE ZAM-BUK FOR.

Zam-Buk cures pimples, skin-eruptions, burns, cuts, piles, festering ulcers and sores, blood-poisoning, salf rheum, prairie itch, ringworm, bud leg, diseased ankles, old wonds, exemna, and all skin-disease. All Dringsists and Stores sell at 50c, box, three for \$1.5, or post free from Zam-Buk Co., Toronto, for price.

SEVEN YEARS AN INVALID

Then She Took "Fruit-a-tives" And Is Now Well.

Arnprior, Ont., Nov. 27, 1908.

I was an invalid for seven years from fearful Womb Trouble. I had falling womb, with constant pain in the back and front of my body and the fear my legs. There was a heavy all down my legs. There was a heavy discharge and this made me weak, sleepless, restless and miserable. Often I was obliged to be in bed for a month at a time. I was treated by several doctors, but their treatment did me no permanent good.

A few months ago, I was persuaded A few months ago, I was persuaded to try "Fruit-a-tives." I took several better, and from the outset of this treatment I was better, the Constipation was cured, and the discharge lessened. I took, for the paleness, several bottles of the Iron Mixture as recommended in the "Fruit-a-tives" book, but I feel that it was "Fruit-a-tives" alone that cured me.

Take Mrs. Levesque's advice. Take Mrs. Levesque's advice. Take Mrs. Levesque's advice. Take Mrs. 6 for \$2.50; trial box 25c. At dealers or from Fruit-a-tives Limited, Ottawa.

Ottawa.

City of Snow White Domes.

The little city of El-Oued, with its population of 8,000 people, at the extreme south of the province of Constantine, in Algeria, is unique even for a Mohammedan city, because of the great number of its snow white domes or cupolas. So extraordinary is the great number of these cupolas that many writers have referred to El-Oued as "the city of a thousand cupolas." The homes of the residents of El-Oued are constructed of white plaster and were it not for the whiteness of the domes would be taken at a cursory glance to be a city of coke ovens .-Popular Mechanics.

Buy of Quinte Railway and Navigation Company

Montreal's Venerable Oanon.

The celebration by Rev. Canon Ellegood of Montreal of his 85th birthday, must have been a source of gratifica must have been a source of gratinea-tion to all the many friends of that venerable gentleman, who is both a vigilant apostle of the church and, old though he is, still a devoted dis-ciple of old Isaak Walton and an enthusiastic golfer. Quite a common sight is that of the canon going over the course at Divic in a time which the course at Dixie in a time which puts many a youngster to the blush. And he invariably spends his sum-mers in the pursuit of the frolicsome salmon or the wily trout. Probably no Montrealer has a better knowledge of the Maritime Provinces than has Canon Ellegood, and he never fails to impress upon his Montreal friends the much-needed lesson that there is no necessity to go out of Canada for recreation at any time of the year.

But the canon has some peculiarities. He is a vegetarian, and although not a tectotaler, he is one of those Anglicans who believe that drink is the cause of most evils. He makes it a rule never to have any liquor lin his house, except, as in following example of St. Paul, to keep a little alcohol ready to meet any stomach complaint. A few years ago Mont-real reporter went to see the old gentleman in regard to some parish business and had an interesting interview. At its conclusion the following col-

loquy took place:
"Do you ever take anything?

The scribe, like most newspaper men, answered in the affirmative, and then the canon said:

"What will you have—an orange or a spale?"

THE GRACEFUL ANTELOPE.

He Seems Born of Light and Nursed In the Lap of the Wind.

For me there have been no fairer days than when the antelope skimmed the plain with legs nebulous with speed on that low gentle canter whose deceptive motion left the best aimed bullet far beaind. For the antelope is the only large animal that is wholly spirituelle. Graceful as he may seem when spurning the ground and swinging high over rocks and brush, to rebound like a ball at the next touch of earth, there is still something earthly about the deer. But the antelope seems born of light and nursed in the lap of the wind. All his movements show that he was meant for the air rather than the earth. Though Nature made a slight change in giving him flegs instead of wings, she made no mistake, and her work has always been the wonder and love of the hunter. When troubles arise the deer the antelope steers for the open sea. The farther the plain sweeps wide and free the more this gay rover loves its safety, and a run that to the deer would mean death is to him only a "breather" that warms him up to the race. Whether illumining the horizon like a shooting star in the clear morning air of the great plain or looming high, like a stilted ghost in the mirage of glowing midday, he is the most charming of all things that run, and his passing has left a great void that nothing can fill. The few that are left, protected as they are, give no idea of the effect produced on a lover of the open by one of the great bands of the days that were, strung out in a film almost like vapor with distance and speed, and vanishing as if in air over the land's outlying verge.-T. S. Van Dyke in Recreation.

OCEAN TRAVEL.

Luxury That Greets the Passengers on an Atlantic Liner.

The luxury of ocean travel has reached such a state of perfection that land bred and timid passengers may almost delude themselves into thinking that they are still on shore when they are in the middle of the ocean. When the luncheon bugle sounds you

go in to tidy your hair. The sun is shining in through your window or at least one of the windows, for there are two in your drawing room, one in the bathroom and one in the bedroom beyond. Your drawing room-which might be in the Winter palace, Nice, for all the resemblance it bears to a ship's cabin-is furnished in old gold and white. A soft carpet of old gold, a sofa piled luxuriantly with cushions, several chairs, a table, a wonderfully equipped desk, on which rests a drop light, are at your disposal. You stop a moment to admire the panels and etchings and the hangings, which are embroidered with drooping wistaria in faint green. An electric grate fire, with a genuine mantel, lends an air of spaciousness to the room. You notice that your gowns have been hung in one closet and your blouses in another and that shoes, slippers, umbrella, etc., have been carefully stowed away in places provided for them.

The third day out, if the weather is fine, is the social height of the trip. The ship's types are by this time all fully developed. The bridge fiends have become known to each other, and they never leave their game except for meals. There is the usual contingent that each morning comes around to tell you how early they were on deck. You have stood at the prow and watched the schools of dolphins jumping straight for the ship, you have rushed excitedly to the rail to watch a passing steamer with which your vessel exchanges salutes by running up innumerable little flags, and you have marveled at the land birds that always follow the ship across, and perhaps you ask the steward to set out some fresh water and a plate of crumbs for them.

If you enjoy spontaneous vaudeville the hour in the ship's gymnasium will be your regular rendezvous every morning, and aside from the fun which you will have in watching the others perform unaccustomed stunts on the frisky camel, the spirited horse or with the vibrators you will receive direct benefit from the exercises, which are the best thing to be recommended for

maintenance of sea legs .- Harriet Quimby in Leslie's Weekly.

ALDEN'S NAPLES STORY.

A Glass of Capri Wine and a Statue That Nodded.

The late W. L. Alden, the humorist, was one of the most abstemious of men-in fact, he was pretty near being a teetotaler. I don't know that I ever saw him take wine or spirits in all the years I knew him except a glass of claret at the midday and even-

ing meals during his last illness. During the later years of his life he spent the winter abroad, sometimes in Genoa, sometimes in Naples and once. I think, in Cairo, and usually his four or five months' residence on the shores of the Mediterranean would not cost him more than £50.

Once on his return from Naples I remember his telling me this story:

"L., a brother novelist, was in Naples also and asked me one night to dine with him at one of the big hotels on the water front just outside Naples-one of those hotels along that massive stone embankment against which the waves of the sea often break in showers of spray thirty or

A DAIRY FARM'S COMPETITION, beer,"

A committee composed of leading farmers and dairymen representing the dairy cattle breeders' associations and the dairymen's associations of Ontario, have completed arrangements for the holding this year of a dairy farms competition through Ontario The prizes will consist of 60 gold and silver medals and diplomas, as well as a large number of special prizes, the details of which have not yet been arranged.

The Province will be divided into four districts as follows :- from King. ston east : from Kingston to Youge St. Toronto; western Ontario, north and south, of a line running from Hamilton to Goderich. There will be a competition this year, for the best farms in each district and 5 gold and 10 silver medals will be offered this year in each district.

The farms will be judged twice; once about July 1 and again some time during December, thus giving the judges an opportunity to see the farms under winter and summer con-

Next year the farms in eastern Ont rio and all farms in western Ontario which win prizes in the competition this year, will be allowed to compete in special competitions to decide the test farm in eastern Ontario and the best farm in western Ontario. Two years from now it is proposed to hold a final competition, in which the leading farms for both eastern and western Ontario will compete to decide the best farm in the Province. Exception. ally fine prizes will be offered in this final competition.

All branches of farm work will be included in the competition. In all 1000 points will be offered. These points have been subdivided as follows: House and surroundings 150; farm buildings 150; live stock 200; crops 200: farm management 150; farm machinery 75; permanent improvements 75. Several prizes will be offered to the farms that score the highest points on the house and surroundings: on poultry on orchards and other similiar départments.

Competitions of this kind were held in Ontario some 25 years ago, and created great interest. The gold medal farmer in the Province at that time was Mr. Simpson Rennie, the well known Farmers' Institute speaker, who now lives in Toronto.

The committee which has charge of the competition is composed of Messrs H. Glendinning, of Manilla; G. A. Gillispie, of Peterboro, representing the Eastern Ont. Dairymen's Ass'u Mr. D. A. Dempsey of Stratford, and S. R. Wailace of Burgessville, repre-senting the Western Ont. Dairymeu's Ass'n; Mr. W. Ballantyne of Stratford, D. Duncan of Don, George McKenzie of Thornhill, R. F. Hicks of Newtonbrook, Gordon Gooderham of York Mills, Simpson Rennie and W. G. Ellis of Toronto and H. B. Cowan, of Peterboro, the Secretary.

Full particulars about the competition may be obtained from the Secretary. Already a number of leading farmers in Ontario have indicated their intention to take part in the competition which promises to create a great interest and be productive of much good.

ARICOCELE GU

NO NAMES USED WITHOUT WRITTEN CONSENT.

Confined to His Home for Weeks.

"Heavy work, severe straining and evil habits in youth brought on a double variescele. When I worked hard the aching would become severe and I was often had up for a week at a time. My family physician told me an operation was my only hope—but I dreated it. I tried several specialists but soen found out all they wanted was my money. I commenced to look upon all doctors as little better than rognes. One day my loss asked nee why I was off work so much and I told him my condition. He advised me to consult I rak Kennedy & Kennedy, as he had taken treatment from them himself and knew they were square and skillful. I wrote them and got Tim Lww Mirrinow Theorems. My prepress was somewhat slow and during the first month's treatment for three months longer and was rewarded with a complete cure. I would not be a single statement for three months longer and was rewarded with a complete cure trained treatment, now I am earning \$21 and never loss a day. I wish all sufferers knew of your valuable treatment.

HENRY C. LOCUST.

HAS YOUR BLOOD BEEN DISEASED?

BLOOD FOISONS are the most prevalent and most serious diseases. They sap the very life blood of the victim and unless entirely eradicated from the system will cause serious complications. Beware of Mercury, it only suppresses the symptoms—our NEW METHOD cures all blood diseases.

ETHOD cures all blood diseases.

YOUNG OR MIDDLE AGED MEN.—Imprudent acts or later excesses have broken your system. You feel the symptoms stealing over you. Mentally, physically, and virully you are not the man you used to be or should be. Will you need the inger signals?

Extracting Wood Oil. Chinese wood oil is obtained from the nut of the wood oil tree by pressing or extracting. The color of the oil varies with the method of extraction. In China it is usually heated strongly and is consequently very thick and black. Wood oil forms a very durable lacquer for wood, far surpassing boiled linseed oil in hardness and perma-

nence. The oil possesses the peculiar-

ity of drying more quickly in damp

than in dry weather. The residue of the nuts left after the removal of the

oil is a good fertilizer, which possesses the valuable property of destroying insects which feed on the roots of plants .- Scientific American.

Scottish Miner's Wit. An amusing comment was made by

a miner at an ambulance lecture in

Elphinstone, East Lothian. The lecturer had stated that if suffocation

from choking was likely to ensue the

simplest remedy to give relief till med-

ical aid arrived was to take a fine pointed penknife and make a small in-

cision in the throat. One of the miners then shouted: "Ye dinna ken Elphin-stone folks. If I was to try that the morn here's what wad happen: If that

man died his folk wad hae me prose-

cuted for murder, and if he got better

he himself wad be the first to prose-

cute me for cutting his throat."-Dun-

The British Museum. In the early days of the British mu-

seum, a century or more ago, the place was open for only six hours daily on five days a week during the summer

and four hours daily during the rest of the year. Nobody could remain in the

building for more than two consecu-

tive hours, and the number admissible at one time was strictly limited to fifteen. Each batch of visitors was

able) the the sary

beer," cannot be counted on to bes ir himself to help wice out the saloons.

Not leng ago a Sunday school suburban to New York City had its first opportunity at pledgesigning. Omit-ing the infant class, about 125 child-ren were present. Over 100 of them signed the pledge. While the signers crowded around the desk there entered one of the deacons, who was also a trustee of the district school. The proceedings were explained to him by one who expressed surprise at the ready response of so large a number. "Oh, it's not surprising," said the deacon; "you know they are obliged to learn all about alcohol in school. My Willie knows more about it than most grown people. Nothing would induce him to drink anything with alcohol in

Willie's father (the deacon and school trustee) had no special interest in temperance. Ho grow up believing there's no harm in a glass of beer,' but Willie knows barer.

What happened in the Sunday school at S--is fact, not fancy. It can be repeated in any locality where the temperance instruction laws are fairly well enforced.

If temperance sentiment is dormant in a town it is prima facis evidence that scientific temperance is being neglected in the schools. Such a community is worthy of double condemnation, for it is faithless, not only to its own children, but also to the welfare of the entire commonwealth.

Near Sandhill there lived a young man, Whose name we will have to omit He lived with his father, but he wanted another

For this we can't blame him a bit

And then to Hamilton he did go, Where he found his honey-uckle He took the fastest train to Kingston To visit his annt and uncle.

When from his honeymoon he returned His friends in Deseronto met him, A kitchen shower for him was given To show they didn't forget him.

Then to his home he took his wife, His other friends for awhile were for gotten.

For when it came to the Charivari
"What we have we hold" was his motto.

He met the boys with "what do you want'

A very natural question no doubt, Then told them they would getsemething If they didn't take to their heeels and

He called to his wife to hand him some

And to get him the double breech loader, Then told the boys to get out of that Or be would soon topple them over.

Soon the bricks flew thick and fast And the 'it was not very dark, He was too much excited to take good aim For they all went wide of the mark.

A collection was then taken up for him And stories to the exact number vary, But as near as we know the amount re

"That's the chaperon." "What's the explanation?"

"Why, it's old De Milyun's clever idea. He thinks his Jane will be per fectly safe as long as Miss Blossom is around."-Cleveland Plain Leader.

The march of progress throughout the Canadian West is one of the most striking examples of what is known as push. The financier, the manufacturer, commercial or professional man, mechanic or homeseeker, when he crosses the eastern boundary or the international line on the south, enters with the spirit of stepping into the battle line for business where opportunities are many and where he knows that his initiative, energy and push will count.

Emigration Heavy.

The tramp of an invading army of immigrants marching on western Canada can be already heard and in fact the advance guards of the new comers are already arriving in our midst The influx which promises this year to exceed all previous years will be from two directions, Europe and United States. The invasion from Uncle Sam's territory has already set in in earnest, and hundreds of Americans are now crossing the borders into Canada.

The past couple of weeks has seen the arrival in the city of a number of homeseekers' excursions from the east and close on to two thousand Ontario men have already arrived to take up homes in the west. They are all a sturdy lot, with lots of farming experivice in the east to back them up. A large number of these men are expected this spring, while their families will be along after the head of the house has prepared a home for them.

From America.

Although the majority of the settlers from the United States are com ing into Canada by way of Moose Jaw a large number are bandl d daily at the immigration hall. The parties coming here are mostly from the East ern States, a number of Pennsylvania people being amougst those looked after last week.

From Europe.

The European arrivals are already very large and every steamer is now bringing over from one to five nundred. A noticeable feature is the predominance of Britishers and the almost total absence of men from Southern Europe.

Banner Building Year.

The central portion of Winnipeg wil. see a wonderful developement this year. Already there has been many of the old I nd marks in the business neart of the city torn out and excavations are being made for many magnificent buildings. This spring central business property is in high demand and the feature in this developement is the large number of financial institutions who are driving their stakes for future expansion.

Farm Lands Active.

The demand for farm property among the colonization and other farm land offices exceeds that of any year since 1905, big sales having closed in the past week to many American buyers, the largest being a tract of 70,000 acres located 35 miles from the City of Winnipeg. Sold to W. P. Davidson of St. Paul, Minn., for a consideration of about \$700,000

Old Timers Re-union.

In the past week the pioneers of Western Canada held their annual gathering at Winnipeg History from the lips of men who helped make the Winnipeg of to-day was told, while about them was the practical realization of their dreams and hopes. Men yet in the virility of middle age told of tramping new made paths into the Canadian west.

WINNIPEG NEWS. Disease of The Kidneys Brought on By Catarrh.

Pe-ru-na Made a Well Man of Me.

I Cannot Speak Too Highly

Mr. George King, 453 St. Denis St. Montreal, Canada, a well-known business man of that city, writes:

"Peruna cured me from what the doctors were afraid would turn into Bright's disease, and after you have gone through the suffering that I have with catarrh of the bladder and kidney trouble, and have been cured you are pretty apt to remember the medicine that did the work.

"Peruna is a blessing to a sick man. Eight bottles made me well and were worth more than a thousand dollars to me. I cannot speak too highly of it. It is now four years since I was troubled, and I have enjoyed perfect health since. Every spring and fall I take a bottle of it and it keeps me

CATARRH of the kidneys is a very much neglected disease.

It is not until the disease has a firm hold upon the kidneys that the patient begins to realize that there is some derangement of these organs.

The slight backaches, the feelings of lassitude, and other warning symptoms of kidney disease are overlooked. They are not serious enough to detain

the patient from his regular work.

Even when he discovers that the kid-

INTERNAL CATARRH REACHES THE KIDNEYS.

neys are affected. he does not recognize the difficulty as being

caused by catarrh.

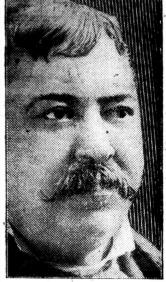

Catarrh is sometimes so very gradual in its approach and its earlier symptoms cause such slight discomfort that it is not noticed.

However, when it is once firmly seated in the kidneys it becomes a difficult disease to exterminate.

Indeed, catarrh of the kidneystis more serious than catarrh affecting some of the other organs of the body.

In the kidneys it is liable to terminate in Bright's disease or diabetes, both of which are recognized as very serious ailments, if not fatal.

The thing to be done, when catarrh of the kidneys is discovered, is to take some internal, systemic catarrh remedy, one

MR. GEORGE KING

tarrh and removes the cause of the difficulty.

Such a remedy has been found in Peruna. It reaches catarrh, no matter where it may be located in the bodywhether in the more exposed membranes of the nose and throat, or whether in the remotest part of the kidneys.

That Pernna is at once the safest and

most reliable remedy for ca-tarrh of the kid-

neysis proven by the many testimonials written by those who have experienced its benefits.

The testimonials given here are only specimens of the many testimonials on our records, pertaining to the relief afforded by Peruna in severe cases of kidney trouble.

Kidney Disease of Long Standing.

Mr. Samuel A. Paxton, 1118 Troost Ave., Kansas City, Mo., member I.O.O.F. and National Annuity Association, writes:

"I am a well man to-day, thanks to your splendid medicine, Peruna. I was troubled with catarrh and kidney disease of long standing when I first began using Peruna. I soon found I was getting better and continued taking it for four months. It cleaned out the system, leaving me well and strong that reaches the very source of the ca-! and feeling better than I have in years."

Pinkham's lable and honest medicine, and that the rtisements regarding its merit are the

the lips of men who helped make the Winnipeg of to-day was told, while about them was the practical realization of their dreams and hopes. Men yet in the virility of middle age told of tramping new made paths into the Canadian west.

Glowingly, prosperously and tangibly evident as is the realization of youth's dreams, hopes and confidence about them, there still burns the optimism and the confidence which lured them in other days to the long trail of the west, that a greater future, a more prosperous situation lies just beyoud the horizon of to-day. In no country in the history of the world's progress has such a situation arisen in half of the allotted span of man's

There are Winnipeggers of virile manhood whose memories of the thunder of the trapping bordes of buffalo are now interrupted by the clanging of electric street cars, by the throbbing of machinery and the myriad voices of a city of thirty times five thousand people. The old timer of Winnipeg is still possessed with the prescient spirit that called him westward in the beginning.

Market Gardening Opportunity.

An indication of what might be accomplished and of the demand that exists in Winnipeg for the produce of market gardens is shown by the fact that the Canadian Pacific Railway Company have decided that they will operate a model garden this season on land the company owns in Winnipeg. Twenty acres will be put under cultivation for the purpose of raising vegetables and flowers to supply their hotel and dining car service. In the fall it is understood that greenhouses will be erected which will be used for flowers and growing winter vegetables

Market gardening about Winnipeg is yet an infant industry. There is not enough supplied as yet from those who are already engaged in the business to meet the home demand and it is safe to say that the Canadian Pacific have been forced to go into the business of growing their own vegetables. The present imports into Winnipeg in vegetables and poultry exceed one hundred thousand dollars annually and with the present growth and developement of the city, the demand is rapidly growing.

In Manitoba and especially lying within a few miles of the City of Winnipeg land as good as in any part of Canada for market gurdening is lying idle, which can be purchased at prices ranging from \$100 to \$250 per acre, and which, if utilized, would yield a revenue on the investment greater than any other business the man of moderate means could put it to. As in prospecting for gold, people coming from England, Eastern Canada and United States have been disposed to see what fortune lies beyond and with this desire have passed many excellent opportunities that lie as yet undeveloped in the Province of Mani-

Preparing an Alibi.

If culture remains confined within the splendidly bound volumes of the new library that has just been bought by a New Yorker it will not be the fault of the rich man's secretary. He is doing everything he can to let it

"I am cutting the leaves in all the books," he said. "The chances are nobody belonging to the family will ever look inside these books, but the boss has friends who may go snooping around through the library sometimes. In case they do he doesn't want them to gain the impression that literature is neglected in this house, so I am making sure that they will at least find the leaves cut."—Exchange.

Eganville Star-Enterprise.

Since Ontario's Premier has become a Sir it is only fitting that this Province should have a crest of its own. We don't know just what special value there may be in a crest, but so long as it does not raise taxes or interfere with the price of exhool text-books there can be no harm in our having one or half a dozen of 'em. At the same time, Sir James will do well to be more interested in another sort of crest-that of the wave of popularity upon which his Government has been sailing. It will count far more than any other sort in an election campaign.

St. John Telegraph.

A scholar who spoke among us lately reminded, us that it is not all of life to be successful in business or politics. That counsel we might well consider in speaking of the Loyalists, and of our debt to them and to ourselves. It may be asked whether, in beautifying and making greater this their city, we might not do well to leave for coming generations some visible and enduring proof that we measured, with some alproach to justice, the courage and the stanchness, the breadth of vision and the love of truth, the true fellowship and the sterling loyalty to King and country, which characterized the Loyalists fathers

The Finest City In Great Britain. Edinburgh may be noted for its learning and for beauty of situation, Dublin may rank as one of the most beautiful cities in the world, Oxford may boast its colleges and Canterbury its picturesque streets and grand old cathedral, but London stands supreme -the finest city of Great Britain .-London Captain.

PHYSICIAN GIVES ADVICE

Tells Why So Many Suffer from Catarrh and Rheumatism.

A distinguished physician, famous for his successful treatment of catarrh and rheumatism, kidney and

bladder troubles, states as follows:—
"Our climate being more or less damp and changeable, is bad for catarrh and rheumatism, and care must be taken not to let these troubles gain headway. In addition, he states that a great many Cana-dians are careless in their habits, and to this as much as climatic conand to this as much as climatic conditions is due a great deal of the trouble. Insufficient clothing and improper eating will cause rheumatic and catarrhal troubles in any climate.

This eminent authority gives the following as the simplest and best treatment known to science, and to it he gives credit largely for his success:+-

Fluid Extract Cascara 16 07. Carriana Compound 1 oz. Syrup Sarsaparilla 6 oz.

Directions: One teaspoonful after each meal and at bedtime. The ingredients are all vegetable,

and have a direct and specific action on the liver, kidneys, and bowels, eliminating all poisonous matter from the system. Any druggist can dis-pense this, or you can buy the ingredients separately and mix at home by shaking in a bottle.
Many of our readers should benefit by this article. Save the recipe.

The chief engineer of the s.s. Multigatawny was drunk. That was nothing unusual; he had often been drunk before. Everything working well, he would undoubtedly be drunk again. It was his greatest But the peculiar feature of the case was that he had chosen to be drunk in the white-painted ableyway that communicated with ablaw," he remarked conversation-the captain's room, and when Capthe captain's room, and when Captain Phillips left his cabin hurriedly, summoned to one bridge by a call through the speaking-tube, he tripped and fell his length over the prostrate, sodden form. The chief engineer swore and grew purple in the face, and the vials of his wrath were unloosed as he scrambled to his feet and glowered at the sinner.

"A greasy, drunken scroundel, not that's what you are!" he snarled. 'A greasy, drunken scroundel, not fit to be carried for ballast! If you must make a hog of yourself, why don't you go to your own particular sty? For two pins, Mr. McLellan, I'd log you, and report you to the owners

The chief engineer staggered upa look of portentous gravity overspread his face, to be followed by a vacant, oily smile. He walked forward a pace, stepped over an impediment that was not there, and lurched against the portly form water. of the skipper whom he took by the' buttonhole in a confidential manner. Ye'll-hic-excuse me, sorr,

he stuttered, 'but Ah'm at thocht troubled ower money matters. Wad ye min' gi'ein' me yer private an' perrsonal opinion o' the Chinese loan tae Turrkey? An' a short but thorough-thorough, mind yedissertation on the question of Thibet-an' railway stock wad be in place. Tae say naught o'-losh sakes! The mon's clean dementit!"

Captain Phillips had broken away from the detaining finger with an oath, and had shouldered the engineer to one side, hastening to the bridge in sheer speechlessness. Mr. McLellan addressed the white bulk

head against which he leaned. Dinna drink." he murmured gravely---'dinna drink! Eh, but drink's a sair thing! I wouldna gang sae far as tae tak' awa' a mon's character, but you skipper's fou! Ay, drink's sair on the temper! I'm thankfu! ''per! I'm thankfu' I'm a sober

Then he slid gracefully down the bulkhead, came to an uneasy rest with his head between his knees,

and snored blissfully.

Captain Phillips was boiling with rage as he mounted to the bridge. The Mulligatawny was trudging through a glassy sea, and the thick smoke from her funnel lay heavily on the water. The tinkle of her patent log rang loudly from the stern rail; the clang of shovels in the stokehold was the chief sound to be heard-that and the steady beat of the engines. But away to the north-east there brooded a thick and sullen cloud, and the second mate pointed apprehensively to the barometer.

said pessimistically

+++++++ dissolute mechanic. He was flushed and thick in his speech, but outwardly calm.

"Ye'll understand," he said "Ah'm in no wise tae blame. Times wi'out number Ah've drawn the superintendent's attention tae you tail-shaft. 'As rotten as a carrot' were ma varra worrds.

The captain, hot with misery and anger combined, took the engineer by the greasy collar and shook him

like a rat.

"Your vile propeller-shaft!" he snarled. "The ship's lost! Look at that!" And he pointed to windward. Mr. McLellan eyed the weather conditions.

"There's a spare shaft doon ally it?"

Captain Phillips fell away in sheer astonishment.

"Don't be a fool as well as a drunkard!" he snapped. "It's out grunted, the captain of all possibility! To ship a tailshaft at sea with a typhoon coming up-well, you're drunk; that's your only excuse:

"Ay, Ah'm drunk, but Ah'm speakin' sober sense. Ah'm the Ah'm the

wee mon as'll dae it, tae."

Now, the spare tail-shaft of the average tramp-steamer is usually kept down the after-hatch, hidden under a few hundred tons of cargo This is in order that it may be in The sternimmediate readiness. gland, where the tail-shaft leaves the hull and protrudes for the proright and swayed unsteadily. Then peller to be fitted in place, is submerged about twelve or fifteen feet below the waterline, and any attempt to draw the broken shaft, and replace it with a new one, would be followed by a mighty inrush of The work of unshipping the propeller, and hanging it, until the new shaft is pointed, is arduous, and taxes the resources of a highly-fitted dockyard. And Mr. McLellan was gravely propounding the suggestion that the Mulligatawny should be repaired at sea. The captain was very angry.

"Talk sense!" he said swiftly. "See about getting the boats pro-

visioned, Mr. Scott.

The mate turned away, but the chief engineer was in deadly earn-

"Ah've a whole case o' whusky in ma bunk," he said stubbornly, "an' Ah'm no goin' tae leave it behind. Ye'd better think o' repairin' the shaft.

It was a forlorn hope, but Captain Phillips was desperate.

"Have it your own silly then," he said ungraciously.

The engineer straightened himself with an effort. He reeled down to the engine-room, and sounds of strife came to the ears of those on deck. The entire stokehold crew, some five in number, poured up wards, assisted by the chief engineer, who was armed with a heavy spanner.

"Worruk, ye gowks!" he yelled, and the spanner fell home cruelly.

The silent Mulligatawny soon be came as busy as a hive. Every man aboard flung himself upon the hatch-battens aft, and wrenched them clear. They had been told that their lives depended on their smartness. The winches were uncovered, the derricks were run aloft, and inside five minutes the cargo was being lugged rapidly out of the after-hold and transported, on a cunning arrangement of wires, to Coming on to blow, sir! he bales and slings of iron, went

stake," he cried; "gi'e's a hand o' you bowline!" And he slipped over the stern with a grim laugh on his lips.

It was killing work, but it was done somehow. The snatt was hauled clear, and the entire Indian Ocean began to pour in through the gaping stern-gland. But the pumps kept the water down, and in one spasmodic gasp of Titanic effort the new tail-shaft was thrust through the opening. Its end showed clear in the aperture, and an eighteen-

foot shark nuzzled it inquiringly.

"Ah canna dae't a' mascl!" grunted McLellan, seeing the gigantic propeller hanging there. been second mate had gradually worked up into a pitch of Berserk rage. He slipped over the stern, and joined the chief engineer at the work. The men on deck threw great lumps of coal at the prying sharks, and the skipper came aft with a revolver that he had never fired be-

"Tak' awa' yer pepper-box!" screamed the chief, as he guided the propeller on to the tail-snaft.

A bullet had clipped the steel close to his hand. He kicked stoutly with a heavy boot at the nuzzling snout of a snark, and brought down a spanner with a backhanded swing on tne nose of another. The second mate aided him gailantly; the propeller tell into place. In went the key; the great stern nut was put over all, and the mighty screwwrench, held by stout ropes on deck, was clapped on to the nut. Then the winch rattled gaily as the nut was hove tight and doubly tight.

A wave stapped the two men painfully as the last turn was given, and a shark took McLellan's boot heel into its jaws as ne nimbly scaled the rope. The typhoon was upon them now. It shot down like a solid thing, and the Mulligatawny staggered to the shock.

Then she becam to drift slowly down towards the rocks.

It was McLellan who started the pumps forward, and opened the seacocks aft. The steamer came slowly to an even keel, as wave after tearing wave lashed over the the tarpaulin-covered cargo on the fore-deck, and the captain bit his fingers to the bone as he waited in dumb misery.

For one long, anxious minute the Mulligatawny reeled wildly over, her scuppers filled with churning water, the oily wake of her broadsided rift stretched far to the north. Then there arose a steady sound that was not the note of the storm.

Phillips gasped.
"Great Scott," he cried, "the

engines are working!"

And they were.

It was not until the steamer was out of danger that Captain Phillips left the bridge and went below. He could have sworn the events of the past hours were but a wild dream, for a recumbent figure lay in the alleyway, cuddling an empty whiskey-bottle.

"Ah'm naught but a dissolute tuttered McLellan mechanic! sleepily. "But the captain micht hae told me his opinion o' you Chinese loan!"'-London Answers.

********** HOME. **************

HOME DRESMAKING.

When working on silk, keep piece of sandpaper near; rub your hands lightly over it when they stick to the silk.

Strips for Bindings.-Inch wide strips kept in the machine drawer are handy for sleeve bindings, facings and bands. Launder the waist before cutting up, as it is much easier than to handle each little piece as it is needed.

Little Gingham Aprons.-Put on two fairly large pockets Then when you have to patch or darn the rents from wear and tear, rip off one pocket and use for the purpose. It all looks alike then, whereas a new piece would be unsightly.

Val Lace Used for Collars.—Do not rip lengths of Val lace but cut the material, leaving a half inch to be turned under when sewed into collars. Fronts can be used for the backs of corset covers. Scraps of embroidery should be saved to mend other embroideries. Place on the wrong side and sew together.

Home Made Baby Bands .-- What to do with those white woolen shrunk paten up stocking caps that are too small. Make baby's bands of them. Cut across the cap about 5 inches or any width desired. Join together, making a smooth seam, or, better still, crocheting ends together so that seams won't hurt baby. No fear of getting them on too tight, because they are knitted and give.

To Lengthen Sleeve Pattern-If a sleeve pattern is too short cut it in two twice, once above the elbow and once below the elbow. Cut it across straightwise with the goods, as it is laid down for cutting. Slip the several pieces away from each other enough to lengthen the sleeve sufficiently for the upper and for the lower parts of the arm. This preserves the shape of the sleeve, while adding length to the wrist or top destroys the proportions. Any part of a waist pattern may be lengthened in the same way. Also a pattern can be shortened by similar treatment by overlaping each piece. The wrinkle so often seen across the shoulders of a waist can be avoided by treating a pattern as described.

COOKIES CHILDREN LIKE.

Good Cookies-Women who have a family of children who are fond of cookies will find this a good recipe: Take four eggs, two cupfuls of sugar (coffee A), one cupful of butter ,and one teaspoonful of soda. Havor to suit taste Mix soft, roll thin, and bake in a quick

Oatmeal Cookies .- One cupful of sugar. One-half cupful of lard. Onehalf cupful of butter. Two eggs. One cupful of stewed raisins, and dissolve one-half teaspoonful of soda in five tablespoonfuls of raisin juice or sour milk. Two cupfuls of oatmeal. Two cupfuls of flour. Drop one teaspoonful at a time on buttered pans, and bake.

Nut Cookies.-Cream one and one-half cupfuls each of butter and sugar, add three well beaten eggs, one-third of cupful of sweet milk, weanesday last, when Aumiral Sir flour to roll sifted with one teaHapp

beat of the engines. But away to the north-east there brooded a thick and sullen cloud, and the second mate pointed apprehensively to the barometer.
"Colling on to blow, sir!"

he said pessimistically. "Good thing careering madly through the we're high-powered, with these air, and were stacked in order under-safé currents and the Clobber Rocks under the lee.

"Yes, a good thing," assented the skipper. would happen if anything went alleyway; I'm sick of him! He's not fit to be carried as ballast! Some of these days he ll catch me in a bad mood, and then he d better take care

The words were hardly out of his mouth when there came a harsh, grating scream from far below, the engines raced violently for a few crack, and then the steady throbbing died away, to be replaced by an ominous silence.

Phillips. "What's that?" Good heavens!"

ane second male bounded from the deck and disappeared down the engine-room. He returned in one minute by the chronometer, and his cal sunburned face was utterly white in patches. Also, he panted as if he had run a race.

'Tail-shaft's gone, sir'' he said curtly. "Clean in two! It's a wonder the engines didn't shake themselves to flinders? The second en-gineer said he always suspected there was a flaw in one shaft.

'Damn the second engineer!' said the captain snappily. "What we've got to think about is what's to be done !

The second engineer came up on was visibly troubled.

A clean break " he explained again broke into ripples of foam.

Something coming "As tow Something along" yelled the skipper. What one you talking about, man! This part of the world in't the Channel, with ships passing every five see nds. There mightn't be another vessel appear in a month. there's a typhoon coming down on es in a tew hours Good heavens! And it's the first accident ever I've come across

The first mate had come to the seene b ythis time, roused by the sunden concussion below the three officers looked at one another gravely, for each man realized what been necessary for someone to go uppended. A dead lee-shore, the fatal Clobbers within a few miles, a swift under-current steadily drag ging the ship southward, and a furi ous gale blowing up to the north it was a combination of circum stances that might have daunted the stoutest heart. On the face of it the Mulligatawny was a doomed ship. We can't sail her off," said the

'We haven't enough canvas aboard. We can't anchor, there's close on a thousand fathoms hereabouts. It's the boats, and nothing else!"

That's about all " said the captain, with a working face. He had though their efforts had been never had an accident in the whole vain. of his career before this.

the stokehold was the chief sound to be heard—that and the stokehold was the chief sound smartness. The winches were unto be heard—that and the steady covered, the derricks were run aloft, and inside five minutes the cargo was being lugged rapidly out of the after-hold and transported, on a cunning arrangement of wires, to the fore-deck. Cases and barrels, bales and slings of iron, went air, and were stacked in orderly array well up to the forecastle bulk-head. And slowly the bow of the steamer sank down, while her stern But Heaven knows what titted up coquettishly. Men panted and eweated as the work went on. wrong below. There's that pig of an The chief engineer had shaken off engineer lying brind crunk in my his stupor, and was doing the work of ten; hitting a loafer here, dragging a case clear there-a case that two men had not been able to move before. SHOWING THE FLAG.

Britain Will Have a Flying Cruiser Squadron.

The new distribution of the British navy, which became enective on Wednesday last, when Admiral Sir William may hoisted his hag on the Dreadnought as commander-incoist of the main fleet, includes the unincation of the naval command in nome waters, the centring of naval activity on the east coast and the strengthening of the fleet in the Mediterranean. The strength the Mediterranean. of the Channel fleet will be reduced, while the fleet may in time disappear entirely.

The eight battleships of the For midable class of 5,000 tons will, it is understood, from the nucleus of a new fleet to be based on the new Scottish base at Rosyth, while the eight King Edwards, of 16,350 tons, will remain in the Channel. Another interesting feature of

the new order of things will be the constitution of a sort of flying cruiser squadron, which will be sent hares, to throw themselves with on a visit to colonial and foreign desperation on the cargo, while ports. One of the first acts of Sir ports. One of the first acts of Sir John Fisher when he went to the Admiralty in 1904 was to withdraw from the fire and beat until it is and "scrap" a large number of cool. Then beat in a pint of whim small and quite useless vessels from foreign stations. Nevertheless, useless as they were the with-The chug-chug of the pumps began drawal of these ships caused some concern amongs British communi-ties oversea, who believe a good deal in what is known as "showing milk, three eggs, salt to taste, and the flag. In order, therefore, to meet the

wishes of these people without reverting to the order of things that existed before 1904, it has been decided to constitute the Second They took it below, and still the Cruiser Squadron on a permanent cargo floated out of the gaping hold and trundled forward. The sky was new shat, out in black and brood- of the world. A squadron for this Cruiser Squadron on a permanent before had the necessary ships been at the disposal of the Admiralty, Amother difficulty presented itself but now that the four vessels of the case of waiting till something comes now. A swarm of huge sharks had Warrior class (13.550 tons), the are in service, there will be no diffi fully assured.

---LOSS IN GERMAN SHIPPING.

North German Lloyd's Shrinkage Unparalleled in its History.

German business men are staggered by the annual report of the North German Lloyd, which shows that the great steamship line's business in 1908 was conducted with the enormous loss of £892,600, necessitating the wiping out of the entire reserve and "renewal" funds.

Of the total undivided profits of £1,699,907 with which the Lloyd began the year 1909, it is left with only £807,307 in the shape of its "insurance fund." The company's earnings in 1908 were only £460,900 as against £1,634,850 in 1907, and £1,965,900 in 1906. The shrinkage is without parallel in the history of German shipping.

Notwithstanding the nature Lloyd's report, its shares closed a few points higher than week previously. The Lloyd was the most active of the German lines to take up the fight with the Cunard for the "blue ribbon" of the Atlantic, the Up to them there staggered the keen eyes blazed.

and built four ships of the Kaiser don't mean sigure of the chief engineer—the 'Ma professional reputation's at Wilhelm II. class for that purpose. common clay.

one teaspoonful at a time on buttered pans, and bake.

Nut Cookies.-Cream one and one-half cupfuls each of butter and sugar, add three well beaten eggs, one-third of cupful of sweet milk, flour to roll sifted with one teaspoonful oaking powder. Brush top with yolk of egg and a little water. Sprinkle one cup sugar, one cup almonds or other nuts chopped fine, and one teaspoon cinnamon over cookies, and bake. Ginger Cookies-One cupful of

sugar, one cupful of molasses, one cupful of butter, two eggs, one tablespoonful of ginger, one tablespoonful of cinnamon, one tablespoonful of soda dissolved in onequarter cupful of boiling water. one saltspoon of salt. Mix, then knead into a dough as stiff as is required to roll out, then put away over night. In the morning roll out, using little flour, if any at all is needed, and bake in good, hot oven.

PALATABLE DESSERTS.

Cherry Biscuit .- Boil together a cup of sugar and a cup of water, and when the sirup threads, remove ped cream, a cup of candied cherries. a cup of blanched and chopped almonds, a tablespoonful of cherry. and a tablespoonful of vanilla.

add as much flour as will make batter. Beat the yolks and whites separately, add yolks to the milk, stir in the whites with as much flour as will make batter. Have some tender apples, peel them, cut them in thin slices around the apples, take core out of each slice and to every spoonful of batter lay in a slice of apple, which must be barq cut thin. Fry in hot lard to a light castl brown on both sides.

Imperial Pudding - Four ounces of rice .eight tablespoonfuls sweetened condensed milk, dissolved in a pint and three-quarters of water. | tirel jam or stewed fruit .two ounces of add butter, short pastry. Simmer the and rice in milk until tender and thick: then add then butter. Line the sides of a pie dish with short pastry and fill it with alternate layers of wrec rice and jam or stewed fruit. letting the top layer be of rice. Bake in a abar moderate oven for about thirty stole moderate oven for about thirty minutes and serve with any sweet sauce liked.

THE LAUNDRY.

Add a little kerosene to your starch; it will keep the starch from sticking to your flat iron.

If on wash day a handle comes off your wooden tub just get busy. Hunt up a handle such as you get in the store to carry a parcel home. Put this in the eyse on the tub. It will last for some time.

Washing Solution.—Empty the contents of a can of lye into a stone crock Cover with two quarts of boiling water. Stir well and when that cold add 5 cents' worth of powdered ammonia, 5 cents' worth of salt of tartar, and 8 cents' worth of borax. Mix well and let stand twenty-four hours before using. A cupful added to the wash boiler of water will clean and whiten the clothes.

NEWS BY MAIL FROM IRE TO BE UNFOLDED TO THE WORLD IN JULY NEXT.

Mars Is Inhabited-Needs \$10,000,000.

If somebody or several somebodies, will advance \$10,000,000 the earth-bound human race will be able to enter into communication with the inhabitants of Mars next July-that is, of the carefully thought out plans of Prof. William Henry Pickering, Harvard's famous astronomer, are practically demonstrated. July is fixed as the time, because the mighty planet then will be 5,000,000 miles nearer the earth than ever before.

Prof. Pickering is confident that Mars is inhabited, and by a class of beings so intelligent that they will recognize the signals flashed from the earth and make reply, and reveal mysteries which mankind has been attempting to unfold for years.

NEEDS SUPPLY OF MIRRORS.

The Harvard astronomer explains his method as follows:

"My plan of communicating with Mars would necessitate the use of a series of mirrors so arranged as to present a single reflecting surface toward the planes. These mirrors would have to be attached to one great axis, parallel to that of the earth, run by motors and so timed as to make a complete revolution every twenty-four hours. It would be necessary to have these mirrors occupy an area of more than a quarter of a mile in order to reflect a sufficient quantity of light to reach the Martians.

"Even with such powerful apparatus as is proposed, the reflected light would not be apparent to the naked eye, but by the use of powerful telescopes the signal from the earth could be discernible. Looking down from Mars this reflection would appear like a small point of light upon the surface of the earth. Supposing, with such a signal in operation, we began a series of flashes, cutting off the sun's rays for an istant and then throwing on the reflection again, repeating this at irregular intervals, following, say, the telegraphers' code of dots and dashes, I have no doubt that, providing there were intelligent people on Mars, the light would at once attract attention and would lead eventually to an answering signal. Once we received such an answer, the rest would be the comparatively easy matter of establishing a code and transmitting mes-

PLAN TO TALK TO MARTIANS

Prof. Pickering stands ready to furnish a method, painstaking and carefully worked out, for actually talk with the Martians in case the coming proximity of the planet reveals their existence. On this point Lesson VII. Paul's First Missionhe says:

"If there were people in Mars who had advanced as far as man has, and who were provided with telescopes as powerful as we to day possess, they would easily perceive our signals and would undoubtedly

"Fear Not: For They That Be With Us Are More Than They That Be With Them."

sair: Lord, I pray thee, open his eyes that he may see. And the Lord opened the eyes of the young man; and he saw; and, behold, the mountain was full of horses and chariots of fire." II Kings, VI, 17.

We will not stop to contemplate the remainder of the narrative, how the same Hand that led the heavenly reinforcement smote the Syrian host blindness, how Elisha led them into Samaria, and dispersed them, giving them rations, and faith sees God, bidding them go to their homes in peace.

It is about blind eyes and how God opens them that I wish you to think to-day.

The natural eye sees a poor youth asleep in the desert with a rock for his pillow, but the anointed eye of Jacob sees a ladder reaching to Heaven's gate, with angels ascending and descending between him and the Great Throne of God.

The natural eye sees only a poor Hebrew among fierce lions about to tear him limb from limb, but the God-protected Daniel sees the angel of the Lord walking through the den closing the mouths of the beasts and bringing God's hero out of the ordeal in triumph.

The natural eye sees two lonely women on their way to a tomb at break of day, murmering "who shall roll us away the stone?" but the eye of faith sees a mighty angel overturning the obstacle and opening the sepulchre for the rising of

THE LORD OF GLORY.

The natural eye sees men raging, like demons about the prostrate form of a poor evangelist, but the Christ-touched eye of Stephen sees "Heaven opened, and the Son of God standing at the right hand of

The natural eye sees a poor apostle bound with chains, sleeping between two sentinels, doors locked and bolted, and four quaterians of soldiers without, but the anointed eye sees the angel of the Lord opening the doors, removing the chackles, leading the captive through the corridors, out through the opening gates to freedom.

The natural eye sees a flash, the

Text: "And Elisha prayed, and of Tarsus looks up to gaze upon the Cross of Calvary, and sees the suf-fering Jesus upon it, crying "Saul, Saul, why persecutest thou me?"

The natural eye sees an aged disciple upon a lonely isle, banished, dying, but John's anointed eye looks through Glory's open door and sees the ...ings that must shortly come to pass.

The natural eye sees history the accidental clash of the strife of men through the ages, but the eye of faith sees God, "within the shadows, keeping watch above His own.

The natural eye sees a body with the last breath leaving it, a bit of clay, waiting to be returned to mother earth, but the divine-touched eye sees a released soul sweeping through the gates, washed in the blood of the Lamb.

THE NATURAL EYE

sees a planet in a mist of sin, going on in giddy aimlessness, but the anointed eye sees a Christ, taking the earth in His arms and carrying it back to the Great Father to join a thousand and other worlds, forever singing as they shine. 'The Hand that made us is divine.'

Open eyes in what we need. Faith is having open eyes. "Now faith is the substance of things hoped for, and the evidence of things not seen." They are not seen by the eye of the body; they are seen bi the eye of the soul.

When a young man's eyes when a young man seyes are open to the great fact of God, he sees all essential spiritual truth. "Oh, it is so hard to believe." said a youth. But it is far harder not to believe. "In the be-ginning, God," is the most rational declaration we can make. Designs come from minds; the earth is a great design; therefore the earth is

the produce of mind.
Your eyes should be open to
the good in yourself. We have
been preaching total depravity too long. "As a man thinketh in his hea.t, so is he." If we tell men that there is nothing good in them, they have a ready apology for their sin. The seed of the divine is in us. There is the germ of goodness in us. All we need is to have the Sun physical ear hears a voice but Saul of Righteousness to shine on us.

HIGH SEAS TRAGEDY.

), cut Sailors Fight With Knives on Wrecked Vessel.

The history of the voyage of the st be barque Eaton Hail, from New-castle, England, to Valparaiso, reads like a chapter in a sensationa! book of adventure.

The vessel experienced a succesed in sion of violent storms, which envater tirely disabled her, and then, to es of add to the troubles of the captain and the officers, a serious disturb-

thick: ance took place among the sailors.

the At the time the ship had been drifting for seven weeks a helpless astry wreck on the ocean, and while preers of etting parations were being made to in a abandon her, some of the crew stole liquor from the cabin and quarreled. It was not long before thirty sweet a fight was in progress. Knives were freely used, with the result that one man was killed and two others wounded.

A small steamer came to the vessel's aid eighty-two miles from Ta-hiti, and agreed to tow her to Tafrom hiti for £600. These services were ies off accepted, and the Eaton Hall was towed to Tahiti, where the seaman, u get who is alleged to have killed his mate, was handed over to the aub. It thorities.

A THRILLING SPORT

An exciting Mexican pastime is when that of flooring bulls with the hand from horseback! The rider, galloping after the bull, seizes it by alt of the tail and, passing his leg over the tail for the sake of leverage, orax. pulls the poor beast round side-ways until it trips and goes crashclean ing to earth amidst a cloud of dust. Needless to say, the bull-thrower needs a strong hand and steady nerves, or he may find himself in trouble. of

who had advanced do tal ac has, and who were provided with telescopes as powerful as we to day possess, they would easily perceive our signals and would undoubtedly recognize and answer them. If a means of communication were thus opened we should no doubt learn much about the planet-in fact, it could be so arranged eventually that we would be able to talk with the Martians as we communicate with each other to-day.

WHITE ANTS REACH ENGLAND

Taken Into the Country in Bunches of Bananas.

The most destructive and veracia foothold in England.

This is the white ant, against whose ravages scarcely anything but metal and stone is proof. His original home is in South Africa, where he devours a village (of huts) at a meal, and depopulates a district in a day, the inhabitants flybefore him as from the plague.

Just how he reached England is somewhat of a mystery, but the most generally received theory is that the banana is responsible. Eggs, brought over in the bunches of fruit, have been hatched out in the underground cellars in London and elsewhere, where much of it is artificially ripered, and the insects, it is averred, have since been disseminated all over the country.

Their most recent exploit was the avasion of Grindon Hall, near invasion of Grindon Hall, near Sunderland, the residence of Sir Theodore Doxford. The ant armies Theodoro Doxford. The ant armies swarmed all over the mansion, rendering it well-nigh untenable for human beings. An expert, who was called in, found half a million of them in the greenhouse alone, with countless inyriads in other parts of the premises.

The problem now is how to exterminate them, for though this is supposed to have been successfully accomplished in regard to a similar plague of the same insects at Leadgate. Durham, by means of a special toxic solution, similar methods have not been invariably successful elsewhere.

Although nothing official has appeared as yet regarding the invasion, it is known that the Board of Agriculture takes a somewhat erious view of the matter. Indeed, it is fairly self-evident that any great increase in the number of colonies will have to be met by the enforcement of an insect alien act of a similar nature to that which was used so effectively some years ago against the Colorado potato beetle and the Hessian fly.—Pearson's Weekly.

DRINKING VESSELS OF ICE.

A factory has been established in Holland for the manufacture of drinking vessels made of ice. They are covered with an envelope of waxed paper, which prevents the unpleasant sensation of handling melting ice. The method of manufacture is extremely simple; the water is put between an outer and inner mould and placed in a refrigerator apparatus, whence it emerges as a delicate crystal goblet fit to receive the choicest vintage. It will be necessary to keep the vessel in a refrigerator until it is wanted.

Even the tadpole can boast of his social position, having been born in

Introduction. - The greater the Electric Lighted Steamboats Furnwork a man endeavors to do, the greater the obstacles that he will meet, and the more numerous they will be. It is a principle of physics that resistance increases as work, like that of all true Christians, was very great, and therefore it encountered formidable oboversome, in Christ's strength; and tects the passengers from the the process of overcoming them equartorial sun, but they are adstrengthened Paul, as it will vised to wear hate account to the strengthen us. I. The Obstacle of Disobedience.

Vs. 1-7. Whither did the missionaries flee when driven from Antioch ? To Iconium, about seventyous insect on earth has obtained five miles southeast. For most of the way they traveled along the great Roman road connecting Antioch with Lystra, turning from it to the left before reaching Lystra. leonium was an important commercial city, situated among luxurant orchards. The Seljuk Turks made it the capital of their empire. The modern town, still called Konia, is greatly shrunken. It is the terminus of a railway to the Bosphorus.

II. The Obstacle of Temptation to Pride.—Vs. 8-18. To what new surroundings did Paul and Bar-nabas go! To a region of Lycaonabas go nia, region being a technical term, a part of the country "consisting of two cities and a stretch of city less territory (i.e., territory organlage system)." Lystra was the capital of Lycaonia, Wolf-land, the name being supposed to be derived new" at or after land. name being supposed to be derived from Lycaon, who was transformed into a wolf-a name well befitting the inhabitants. The missionaries went theither "as sheep in the went theither "as sheep in the midst of wolves" (Matt. 10: 16). It was a wild region, cut off by the Taurus from the more cultivated Cilicia and Pisidia. It was a dreary plain, destitute of trees and fresh water, with only salt lakes.
III. The Obstacles of Hatred and

Persecution. - Vs. 19-28. shows the intensity of the opposi-tion Paul had aroused in Antioch ! tion Paul had aroused in Antioch 1 That his enemies had followed him Infuriated Animal Nearly Killed Little Tot. up, though it was more than one hundred miles by road. 'Woe unto you. said Christ, when all men speak well of you. One must e somebody in order to have an enemy. One must be a force before he can be resisted by another force.

How did Paul's enemies succeed? They persuaded the people. Perhaps, as the stoning of Stephen must have moved Paul toward Christianity, the stoning of Paul was the turning point in the life of Timothy. The young man may have been among the disciples who stood round about him, to give what aid they could, and care for his body if he were really dead.

What had been gained by this first missionary journey! 1. The great enterprise of foreign missions was started . 2. The missionary leaders had received their first experience, had learned much, and had furnished a glorious example to others. 3. The borders of the church had been greatly enlarged, being extended to Cyprus and Galatia. 4. The borders of Christian fellowship had been enlarged to a still greater degree by the free admission of the Gentiles. 5. This outreach of activity and thought t-roadened the horizon of the home church, and greatly stimulated its energies and depend its piety. Max Muller says that only missionary religions are living religions; airships.

Four steamers are now running regularly on the Victoria Nyanza. The Winnitred and her sister boat the square of the velocity. Paul's the Spoil, of 600 tons each, can work, like that of all true Chris spread canvas at need and have cabins and dining rooms lighted and A double awning of canvas pro-

the awning. The firemen and deck! hands are half naked negroes and the cook and steward are Hindus or halfbreeds.

The English officeers and a few first class passengers are the only white people on board, but Arabsh Eurasian and Hindu traders and money lenders and nalfbreed traders, often formerly slaves, with Sikh, Somali and Egyptian soldiers are likely to be represented among the second class passengers.

The food is well cooked and the

variety sufficient for the cost, which is about \$.65 a day without extras. You can have a cup of tea or coffee and a biscuit before breakfast at 8 o'clock, when fish, eggs; bacon, toast, fruit marmalade, coffee and tea are served.

At 1 o'clock a very substantial lunch of soup, meats, curric with rice and desert and a very hearty dinner at 8 o'clock in the evening certainly give the traveller all that

A "peg" (Anglo-Indian slang) may mean a drink of any kind, but is usually a mixed drink, such ar whiskey or brandy and soda water, claret cup, half and half or the like. The lake water, duly cooled is good enough for a "cold peg," savs a writer in the National Magazine. and the tea and coffee are fairly excellent ---

A BABY AND A BULL.

A mad bull nearly succeeded in killing a baby in a mailcart and wrecked the gardens in twenty houses at Acocks Green, near Birmingham, England, recently.

The animal was being led to the slaughterhouse, when it broke loose and escaped into the garden of an adjoining house. Butchers and others gave chase, armed with guns, and a shot served to enrage the animal still further. It tore through fences, smashing garden frames and everything else in its way, and stopped to investigate a mail cart standing outside one of

the houses.
The baby's mother rushed out to save her child, but the bull charged at her, and she retired. The animal then rushed at the mail-cart and over-turned it, but fortunately the baby fell into the hood of the cart. After sniffing at the overturned cart, the bull left it but returned again and smashed it to pieces. Happily, the child was again unhurt

The animal conitnued its mad course through the garden fences until it became wedged in the narrow entry of one of the houses, and was secured and killed.

An entire battalion of the Geran Army is being trained in the use or

WOMAN UNEQUAL TO MAN

WOMAN IS THE ASSISTANT OF MAN.

French Matron Criticizes American Wives and Mothers as Incompetent.

A French matron, with considerable knowledge of American homes, she claims—Mme. Constance Crev-alier—discussed "How to Become Good Wives and Mothers" recently before a club of New York mothers.

"Woman was put in the world to the assistant of man," she said, be the assistant of man, "to look out for his welfare and take care of his clothes, his food and his home. American women have no such idea of the home. They do not want children-they want societies and clubs.

"What do you think a man marries for? He surely wouldn't marry if he were not looking for a woman to take care of him and if he didn't care for children. But what of the woman? She marries for home and for a husband to support her, and not because she cares to have children. That is, the American wo-This attitude is not men do not. mere idle talk, but it is so well known that it is proverbial of them. AGAINST WOMAN SUFFRAGE.

"The American housewife is too extravagant. She would find that she would fare much better if she were more careful of her husband's earnings, and this is truer of poor people than of rich. I have seen children on the East Side, who haven't bread at home, whose parents will give them pennies to get candies and other indigestible sweets, when those pennies really are needed for necessities.

"Every child in this country should be taught to be economical. self-suporting and healthy, and if Carnegie or other millionaires in your country would endow an institution where American women could be taught to be proper wives and mothers, my husband and I would gladly spend our lives there to benefit the women of this coun-

Asked if she believed in suffrage for women, Mme. Crevalier said emphatically, 'No.''

Women and men should not be on the same step-the woman is not made to be by the Creator," she commented.

WHY MEN LEAVE HOME

"But what of unmarried women -old maids-they have no home duties," someone said.
"Oh, well, all I can say is that

if old maids are not attractive enough to get husbands, they surely do not think that they could have any influence in a larger way—the reditional life—with man," she said. political life-with man,'

Asked why men leave their homes for "soul-mates," madame said that was because it is seldom that a man marries his "soul-mate."
"He sometimes finds her after ward," she said, "when his wife she said, "when his wife begins to burn the bread and put her hair up in curl papers and pomade her face.

The 'soul-mate' doesn't come while the wife makes it her duty to look beautiful and be amiable and take care of him-darn his stockings and teach the little girls to

when he comes home after work.

"But Earle's wife was domestic and did everything for him," said THE WAITING BABIT.

Which Mr. McWhaekt Hopes Mac-Whackt Junior Will Never Contract.

"I suppose it's a fact,' said Mr. MacWhackt, "that about the worst habit you could contract is that of sitting down and waiting for something to turn up.

"I've known a lot of men that have had this habit, but I have never known one of them to have anything come to him yet. course there's a chance of a man's being struck by lightning, but if you take the total population of the world and divide by the number struck you would find that the chances of being struck are very small, and the chances of anything coming to a man who is waiting for something to turn up are a great deal smaller still.

"You see, as I tell my son, William MacWhackt, Jr., something, that is to say something that we are always looking for to turn up, is really not, as you might say, a thing of a migratory nature, that is, not a thing that seeks people. In fact one of its chief characteristies consists in its inclination to stick somewhere, generally more or less far off, in which it is like gold in its raw shape, which lies buried in the earth at a great distance, where we must go and dig for it and dig hard if we want to get it. Measles and various other afflicprosperity, which we must go out and seek.

So I tell William that I hope he won't join the great army of those who sit down and wait for some-thing to turn up. He might be struck by lightning, but the chances a terible waste of time to figure m'out and there wouldn't be any-

thing coming to him then.

"What I hope is that William will get out and look and dig for what he wants and not sit down and wait, and he won't find the competition as keen as perhaps he thinks, for really there are not such an everlasting lot of steady, stick to it diggers. There's a chance for to it diggers. every man that means business.

tell Willie that if he doesn't get the biggest prize in the whole world hell get something, and something worth having, if he'll only get out and get to work around among men in the places where the diggings are found.

That's what I'm hoping William Jr., will do-go out and work like a man for what he wants; the thing of all others that I hope he won't do is to sit down and wait for something to turn up.

*---PLENTY OF CHALK.

Prof. Wm. Thomson's Assistant Followed Instructions.

When Prof. William Thomson, afterward Lord Kelvin, was at Glasgow, his absorption in his work was very great, especially his class work, and he much disliked to be brought down to earth by any slight—chance or inconvenience. Examples will occur to every old pupil, writes Andrew Gray, of the great emphasis with which he commanded that precautions should be taken to prevent the like from happening again.

On one occasion, after working out part of a calculation on the

MURDERED BY SAVAGES

HOW AN ENGLISHMAN MET DEATH IN WESTERN CHINA.

Chief Demanded His Rifle, Which The Englishman Refused to

A thrilling account of the murder of Mr. Brooke, an Englishman who was killed on the Lolo border of Western China, is contained in a letter written by a fellow-traveller, and published in The London Times.

Mr. Brooke arrived at Ningyuenfu, a prefectural city in Szy-chuan, situated on the border of territory marked on the maps as the country of the Independent Lolos, on December 4. He decided to make a short trip to the Lolo border, and left, accompanied only by two interpreters and three coolies.

No news was received from him, and spies were sent out, who re-turned with the account of the tragedy, related in the letter as follow

Brooke left here on December 4, and went north a few miles and slept in a house. Netx day he met one of the Lolo chiefs, who feasted him and gave him an escort on to tions come to us, but not so, as a another chief, and he again to anrule, with something, meaning other chief, and so he went on slowly from chief to chief till December 24.

On this day when on the road early in the morning he met a pow-Ahheolabow. erful chief called This chief demanded Brooke's rifle. Brooke said that he needed the rifle are so much against it that it would and could neither give it to him nor sell it. The chief threatened that he would take it by force, and struck Brooke three times with his sword.

Brooke did not resist, but just wiped the blood from his face and retreated with the coolies. brother of the chief tried to calm him and prevent him from killing the foreigner, but Ahheolabow boasted. 'The Chinese have sent many soldiers against me who have always been defeated; I have just defeated their foreign-drilled sol-diers, so now I will kill a foreigner and see what happens.

He pursued Brooke and his coolies. One by one the coolies were overtaken and killed. Brooke fled for nearly ten miles with the Lolos in hot pursuit. He jumped a stream and was met on the other side by some braves who had been collected by the war whoops. They signalled to him to give up his rifle and they would let him escape.

He gave up his rifle, but Ahheolabow still followed, whereupon Brooke drew his revolver and shot him and his companion dead. killed and wounded some fifteen of the Lolos before he was finally, overcome and bound; another brother of Ahheolabow then came upland killed him.

STILL RING CURFEW BELL.

Many Towns Where Old Customs Yet Prevail.

The coresspondence which has recently appeared in English papers on the subject of the curfew has brought to light a number of interesting facts. The curfew bell is still rung regularly in a number of long-fixed blackboard on the wall parishes all over the country, and long-fixed blackboard on the wall parishes all over the country, and behind the table, his chalk gave incidentally other old customs have breakfast plan, according to which that w

SHOOTING WHALES.

Modren Whalers Use a Cannon and an Explosive Harpoon.

Whaling with modern methods in Alaskan waters is an exciting game especially for those who are new to the business.

The modren whaling steamer is a little vessel almost round on the bottom, which enables it to be turned and managed with the greatest ease. Mounted at the bow is a small cannon that shoots a harpoon weighing more than 100 pounds extraol and having an explosive head, called came t the bomb. If the shot is good and the har-

poon is planted squarely behind the fin, says the London World's Work, the bomb crashes into the lungs, bomb crashes into the lungs, killing instantly; if not, the struggle may last for several hours.

After a whale has been killed the carcass is brought alongside the boat and inflated so that it will float. A long coil of rubber hose one end of which is attached to a pump and the other to a hollow spear pointed tube of steel, with perforations along its entire length, is used for this purpose.

The spear is thrust well down into the whale's side, the air pump started and the body slowly filled with air. When inflated enough to keep it afloat the tube is withdrawn, the incision plugged with oakum and the carass cast off. A bouy with a flag is attached to the body and it is then set a arift to be picked up at the end of the day's hunting.

The whaling station is a group of buildings situated in a boy or cove near enough to the feeding grounds to allow the steamer to come in each night with the day's catch. The whales are anchored at a bouy in front of a long, inclined platform, upon which they are drawn, tail first, by means of a steam winch.

The saying that every part of the pig but the squeal is now of market value is also a fact with the whale. Not a particle of the animal is wasted. After the skeleton is strip-After the skeleton is stripped of flesh it is disarticulated and the bones chopped in pieces.

The blubber is tried out for oil and the meat and bones are boiled for the same purpose. Later the but wi flesh is artifically dried and sifted, making a fine guano, and the bones are ground up for fertilizer. Even the blood is boiled and dried with the flesh, and the water in which blubber has been tried out makes excellent glue. The fins and tail after being sliced into thin strips are salted and barrelled and shipped to Japan as an article of --

TWO MEALS A DAY.

Prominent Doctor Plans Daily Rations.

"Going without luncheon," breakfast, or even dinner, is not to be considered a hardship nowa-days, when two meals are thought sufficient daily rations.

A prominent doctor has formulated plans for two meals a day which, he avers, should suffice for any one, whatever his occupation. He offers the following alternatives:

1. The breakfast should be of a substantial character. Replace the mid-day meal by a glass or two of water, a bowl of soup, or some fruit juice, but no solid food. For supper you will have an appetite not to be desired.

· VINEGAR WHIPPING.

Is Latest Cure for Nervous Troubles in Paris.

One of the latest medical "cures in Paris for people suffering from various forms of nervous maladies is called vinegar thrashing or flick-

At least two medical men in the "Gay City" are now treating patients by this extraordinary new process, and it is claimed that some marvellous cures have been effected.

It is claimed that "vinegar flick-ing produces the most beneficial and rapid results, completely curing cases of nervous debility and nervous prostration and most other forms of nervous diseases. The methods of the "flicker" are as fol-The patient is sent into a dark

room and made to strip, whereupon the doctor, armed with a long, rough towel, steeped in vinegar, proceeds to thrash the patient all over the body, constantly redip-

Is may be imagined, the process is the reverse of pleasant, and constatues especially with delicate skins a particularly refined form of terrare. At the end of about ten minutes the most social subject is forced to ery out that he has had enough

The treatment is accordingly stopped rumediately. The patient is then vigorously rubbed, and after heine clathed in a bath robe is ironed all over with hot irons.

NESTS THAT WEIGH TONS.

Are Often 15 Feet in Height.

In Australia are to be found the

largest, heaviest and most peculiar nest, in the world, says the London These are the nests of the jungle

fowl, smalled, and are built in the form of great mounds, the average measurement in height being 15 feet and the circumference 150 feet. The nasts are erected in seclude I sheltered spots and, as in the case of the small mesis of birds, they are skilfully interwoven with leaves, grass and twigs and such other suitable material as the fowl may be able to

procure

A similar system is followed by the bush turkey, whose home is, however, more comprehensive in design. Its shape is pyramidal. It has been asserted by Austrahan macuralists that the nests of the bush turkeys, which live in colonies, are so large that to move them requires the zervices of six or seven men.

Examples will occur to every old pupil, writes Andrew Gray, of the great emphasis with which he commanded that precautions should be taken to prevent the like from happening again.

On one occasion, after working out part of a calculation on the long-fixed blackboard on the wall behind the table, his chalk gave out, and he dropped his hand down to the long ledge which projected from the bottom of the board to find another piece.

None was there, and he had to walk a step or two to obtain one. So he enjoined McFarlane, his assistant, who was always in attendance, to have a sufficient number of pieces on the ledge in future to enable him to find one handy wherever he might need it.

McFarlane forgot the injunction. the time, and the same thing hap- days pened the next day. So the com-mand was issued. McFarlane, I told you to get plenty of chalk, and you haven't done it. Now have a hundred pieces of chalk on this ledge to-morow; remember, a hun- hour varies greatly: dred pieces; I will count them.

McFarlane, afraid to be caught napping again, sent that afternoon for several boxes of chalk, and carefully laid the new, shining white sticks on the shelf, and neatly parallel, at an angle to the edge. The shelf was about sixteen feet

long, so that there was one piece of chalf for every two inches, and the effect was very fine.

The class the next morning was delighted, and very appreciative of Thomson McFarlane's diligence. came in, put up his eye-glass, looked at the display, smiled sweetly, and turning to the applauding students, began his lecture.

THE ROAD TO OLD AGE.

Paved With Pie, Says Former Mayor of New York.

Everybody with a taste for pastry or a weakness for sweets will hall with joy the explanation Smith Ely, Mayor of New York City in 1877-78, and now 85 years old, as to his prolonged life.

Sweets did it, says Mr. Ely,

Sweets'did it. says Mr. Ely, in the Medico-Legal Journal. I don't know that this diet of sweets has benefitted my disposition, but it has gievn me strength to undergo the nervous strain and excitement Those of Australian Jungle towl Washington and New York that would have shortened the existence

of a beef-eater.

My parents, like many others. says Mr. Ely, "thought that sweets of any sort were unwholesome, for children, and I enjoyed only such things in my childhood within strict limitations. Consequently, when I attained the age of sixteen and Consequently, when I found employment downtown, with permission to dine as I pleased, I made up for lost time. My regular meal for many months consisted of three or four pieces of bakers' pie. At all periods of my life the dessert has always been the better part of my meal. I resided for more than twenty

years in the neighborhood of the Fifth Avenue Hotel, and during all that period it was my regular habit. on my way home from clubs and entertainments to stop at Mallard's and have a merigue glace, followed with a cup of hot thosolate with whipped cream.

It has been, and still is, my habit to place a lump of confectionmaterial of a single nest has been found to weigh upward of five tons. retiring for the night." Yet Prevail.

The coresspondence which has recently appeared in English papers on the subject of the curfew has brought to light a number of interesting facts. The curfew bell is still rung regularly in a number of parishes all over the country, and incidentally other old customs have been mentioned.

In a few cases it appears that the old curfew is really the signal to the parishioners for bedtime, at least for the children, and, in addition, there are many traces of the angelus bell, the apprentices bell, the pancake bell, and quaint customs connected with market crosbutter crosses (apparently merely a variant of the other farm produce were the great feature of the market), stocks, shambles, bulior could not obtain more chalk at rings, and similar relics of other

The result of the recent correspondence is the following list of places where curfew is rung nightly. In some cases the bell is rung for only part of the year, and the

----WHEN WE GO TO BED.

Some Medical Men Say Lie on Your Back.

A number of eminent medical men have given their opinion to The Matin of Paris on what they consider the healthiest position for sleep.

Dr. Delorme, Army Medical Inspector, declares that the natural position is to lie flat on one's back. Professor Debone and Dr. Daveniere, of the School of nygiene, are of the same opinion, and point out that lying on either side causes pressure of the arm which may eventually bring about paralysis.

Dr. Landouzy of the Medical Faculty, says that the best position is the most comfortable position, and this is acquired by habit. It would be well, however, to accustom oneself to sleep on the right side. Dr. Letulle, of the Medical Academy, maintains emphatically that one should always lie on the right side, and thus avoid indigestion and heart troubles.

In startling contradiction comes a statement from the heart specialist, Dr. Huchar: "I always sleep on my left side, and I think it is quite immaterial whether you lie on your left or right side The idea, however, that those who cannot lie on the left side suffer from heart affection is quite erroneous."

ALCONCES THE TOHORING WINGTHE tives

1. The breakfast should be of a substantial character. Replace the mid-day meal by a glass or two of water, a bowl of soup, or some fruit juice, but no solid food. For supper you will have an appetite not

to be desired.

2. The second method is the nobreakfast plan, according to which the first meal is eaten five or six hours after rising, and the second meal after another interval of about the same length.

One objection to the no-breakfast plan is that rather a hearty meal is needed when one's time and energy are usually required for employment rather than digestion. The objection may in a way he overcome by having a moderate or light lunch at noon, reserving the evening for a more hearty and sabstantial meal.

With the business and professional man, as well as with nearly every other worker, a substantial break- ting o fast is the plan which accords best with all the organism being properly furnished to begin the work of the day.

The professional or business man or woman may dispense with lunch heaver to advantage. He may, if he desires, tak a mid-day luncheon of liquids, without any solids. This may consist of one or two glasses of water, tea, coffee, chocolate or other fluids.

CHARACTER IN EYES.

Hazel Eyes Most Beautiful From Scientific Point of View.

Hazel eyes are the most beauti- is due ful from the scientific point of view. They denote fearlessness, depth of long a character, a level head, and a big capacity for reciprocating any little kindness shown. Blue eyes reveal a butterfly temperament. They are usually possessed by pretty girls whose chief aim in life is to be amused and petted-the type of woman who cries on the least provocation, and always fails at a crisis.

And there is the woman whose eyes are coal black; she may be either a goddess or a termagant. If her eyes slumber beneath droopy lids, and her gaze is soft and invit-ing, she will be a passionate woman, whose love will be almost idelatrous in its intensity. She will exhibit a dog-like fidelity to the object of her affections.

But if a woman's eyes are large, black and luminous, lighting up, as it were, her entire countenance, she will be a person difficult to please, her vitality will be marvellous, and the business instinct will be strong within her.

She will always succeed by sheer force of personality, and will not hesitate to sink the finer instincts inherent in all women in order that she may achieve that which she has set out to obtain. A dangerous woman at the best of times.

CLOC.. MADE HIM ILL.

A Bavarian peasant named Steinbacher is lying in a hospital suffering from acute nervous prostration, brought about by a clock. A few months ago this peasant bought an alarm clock, and he was so anxiout about it that he sat up every night for two months to see if it would go off properly. The resultand los of sleep brought him to the hospital; at least, this is a story that is going the rounds of European papers.

The Old Aim at the Reconstruction of Country Life in England.

A land movement of silent but ounds extraordinary rapid development came to a head at a remarkable convention of land clubs held reconvention of land creating the centre of th

District after district in the southern counties have been starting land clubs for the "reconstruction of English country life." Agricultural Laborers Union of Norfolk has got 5,000 members and £1,000 balance in the bank, and every member pays twopence a week. It is on the point of spreading into other counties, and something like a trade union of agricultural laborers is in sight.

THESE LAND CLUBS.

unions, and societies were at the meeting federated into a union on the following motion proposed by Mr. John Robertson, M.P.:

That this meeting approves the formation of a Central Union of Land Clubs and other similar societies, and further appeals both to existing societies of small holders and laborers and also to all progressive people interested in the rural revival, whether resident in cove town or country, to support the movement now founded for restor-English country life, and further appeals to country people to organize themselves by forming land clubs to be federated into this union.

This was the achievement of the meeting, and the burden of the speechs, many delivred by Liberal members, was that the Government and the County Councils had allow ed the small holdings act to become The members of nineteen a fiasco.

land clubs had

APPLIED FOR 5,000 ACRES,

but with two exceptions none had er the obtained land, nor had many any ifted. bones prospect of attaining it.

Mr. Morrell, M.P., said that as many as forty-eight County Councils have done practically nothing, and two counties, Cambridgeshire and Norfolk, are responsible for about half the land found for small s and holders. Norfolk takes the lead, and in that county notice has been given this week of three compulsory sales, a completely new feature under the act.

The new federation will at once make a strong representation to y Ra- the Government itself to buy land, to set up model colonies of small holders, and to appoint a commis-

The effect of this movement on the Board of Agriculture is, indeed, lought already apparent, as this week cirsculars with a number of precise and crucial questions have been sent out to all County Councils.

by tricks.

r sup-

500 SWEARS FOR CHARITY.

Church Built by Generosity of Gambiers.

Opinions vary widely, apparently, as to the rights and wrongs of the various ways of raising money for charitable and religious objects.

All over the continent of Europe, for instance, as well as in Ireland lotteries are continually being held for these ends, and even in England church and chapel bazaar raffles are not unknown. Yet the wellmeaning parishioner who the other day suggested that bridge-players should put aside a percentage of their winnings to help restore a certain sacred edifice was promptly snubbed for his pains by the incumbent thereof.

On the other hand, there is at least one church in New South Wales which owes its existence to the generosity of the reckless gamblers of the old gold-digging days. The bush parson used to leave the flap of his tent undone when he went to bed at night, and the lucky ones, returning at dawn to their claims after a night's carouse, would pitch through the opening a nugget of a bag of yellow "dust" with the cry: "Here you are, Mr. Sky Pilot!" Sky Pilot!

Local tradition has it, too, that the handsome cathedral of La Guary, in Venezuela, was built through the self-denial of the early inhabitants, who agreed to fine themselves fifty cents every time they used the favorite Spanish ed-

pletive 'caramba.''

This, of course, is a very old dodge for checking the undue use of what are commonly called "swear words," and it is in force of in many shops, institutions, and so forth at the present day. Thus, for example, there is in the yard of a certain London motor-cab company, a collection box belonging to the Invalid Children's Aid Association, into which a half-penny is voluntarily placed each time a naughty expression is inadvertently let drop. When last opened, a few weeks back, the box contained 500 coins, but it is only fair to add that the receptacle had not been cleared for nearly eight months previously.—Pearson's Weekly.

WOMEN MASTERS OF HOUNDS.

First Known 1891-Over a Dozen in England Now.

Twenty years ago the idea of a woman nunting hounds or even being master of a pack of hounds was considered utterly preposterous and absurd in England. No right think-ing man of that period but would have- unhesitatingly declared the privilege of writing 'master of foxhounds' after the signature to be as essentially a masculine prerogative as the using of razors or the wearing of trousers.

One can therefore picture the storm of criticism which flooded the sporting papers when in 1891 a woman in the person of Mrs. Cheape appeared to demonstrate that it was both possible and practicable for a woman to hunt hounds. Once Mrs. Cheape had come forward as a leader, says Bailey's Magazine, other women were not slow in imitating her example. In 1894 Lady Gifford and Mrs. Pryse-Rice also started private packs of harriers. Mrs. Taibot Price, Miss Parkin and Miss Hazel West becoming masters of foot beagles in 1901 and 1902 suc-

33 YFARS IN JAIL CELLS IN MERRY OLD ENGLAND

JESSE POMEROY MAY SEE DAYLIGHT.

dren-Aged Mother Thinks Him Innocent.

After thirty-three years' solitary confinement in the Charlestown, in an aperture in a stack of bricks a Mass., prison, Jesse Pomeroy, the "human fiend" may again see day.

"Mr. Andrew Carnegie has offered light.

Pomeroy was a steel-eyed boy of seventeen when the world declared him dead and locked him behind the doors of Charlestown prison. Now he is a man of fifty. From seventeen to fifty he has known From nothing but darkness and solitude.

The men who bore witness against him, the attorneys who defended him, the jurors who called him guilty, the judge who sentenced him to death, the Governor who saved him from the rope-all are dead.

Once a day a jailer slips his food through a slip in the darkened cell and peers in to make sure that his prisoner hasn't died during the night.

Once a month the prisoner's mother-the only person in the whole world who thinks him innocent-talks and weeps with him through the bars for an hour.

Once a year the Governor of Massachusetts and the Prison Commission walk through and stare curiously at the prisoner. Occasionally Chaplain Barnes visits him and talks to him.

MAY SEE THE LIGHT.

These are the only breaks in

Pomeroy's sunless years.
And now relief may come. A
bill will be introduced in the present session of the Legislature-it is aimed at Pomeroy-allowing all prisoners to work in the daylight and with their fellow-prisoners.

This boon Pomeroy has craved. Just to see the daylight, to see people and talk with them -it's all he has ever asked. He has refused to work unless he could work with the other prisoners.

Just what Pomeroy is to-day only the prison officials know-and they won't tell. "You may see all there is to be seen in Charlestown prison," General Bridges, the warden, says, "except Pomeroy.

At thirteen he was assaulting and torturing boys of six. He was put in a reformatory, where, after three years, he was released on parole.

A little while after, by his own confession, he assaulted and but-chered little Nellie Curran, and buried her body in the cellar of her father's store.

At seventeen he was found guilty of slaying a five-year-old boy in Boston. The law, outraged, called him unfit for freedom, or even human asociation. His long term in prison began.

HAS DEVELOPED INTELLECT.

With all his preverted and degenerate instincts, Jesse Pomeroy is an intellectual man-even brilliant. He has read every one of the 8,000 books in the prison library, and half a thousand more belonging to Chaplain Barnes. reads in the original the works of Latin, French, German, Spanish, Italian and Arabic authors, having learned all these languages prison.

Besides reading, Pomeroy has one

DIMINUTIVE FARMS.

Those in Portugal Have Been Cut tp Anto Small Portions.

The Portuguese are an extremely conservative people. Every man follows rigidly the methods wal ployed by his father and forefathers. in very many parts of the country the old wooden ploughs are said used.

When a man dies instead of one of the heirs taking the whole property and paying the remaining heirs for their parts the whole property is divided into as many parts as there are heirs. More than this, each separate part of the pronot perty is thus divided.

Thus if a property consisted of ten that acres of pasture land, eighty of has vineyard and ten of grain land, rous and there were ten heirs, each heir would receive one acre each of grain and pasture land and eight acres of This process has been vineyard. going on for a long time, so that now in the most fertile part of rortugal the land is divided into incredibly small portions.

The immediate result of this that the product of the land is barely sufficient at best to sustain its owners. South of the river Tague, on the other hand, there are enormous tracts of excellent land lying unused, but it has been found impossible to induce the farmers of Euro- the north to move into, this region and take up large holdings.

leader, says Bailey's Magazine, other women were not slow in imitating her example. In 1894 Lady Gifford and Mrs. Prysc-Rice also started private packs of harriers. Mrs. Taibot Price, Miss Parkin and Miss Hazel West necoming masters of foot beagles in 1901 and 1902 successively.

The first woman to undertake the mastership of foxhounds was Mrs. Hughes (Neuadd Fawr) in 1902, and the next year Miss Edith Somerville commenced her successful reign over the West Carbery. In 1904 Mrs. Rigden became joint master of the Tickham foxhounds, and the Misses Rose-Cleland started their pack of harriers. The year 1906 gave the North Northumberland a woman master, Mrs. Burrell, Mrs. Pardo Kirk also starting a pack of draghounds in Ireland, and the Countess of Craven entered on her first season as master of harriers, while 1907 produced no fewer than three new women master of hounds

A FAMOUS REGIMENT.

Composed of the Offscourings of

The French "Foreign Legion" is probably the best-known regiment in any of the world's armies. Nevertheless, there is a lot of misconception concerning it, due principally to Ouida, who drew an alto-gether fancy picture of it in "Under Two Flags."
As a matter of fact, the life of

an ordinary private of the legion is about as hard and monotonous a one as it is possible to conceive of. Discipline is enforced with pitiless severity, death being the only punishment for most offences. More-over, the officers are all Frenchmen, so that no "ranker" can ever hope to earn a commission, no matter how much merit or bravery he shows

Although usually termed a regiment, it is really more in the nature of what we should call a brigade. for it numbers some 12,000 men of all ranks. More than half of these are Germans, deserters from the Kaiser's army, or natives of Alsace-Lorraine. The remainder is large-ly made up of the riff-raff and offscourings of Europe, with a sprinkling of well-born adventurers, who have enlisted into the Legion "for the fun of the thing" and because they know they are sure of seeing some fighting. Amongst these latter are usually to be found a small percentage of Englishmen, one of whom, George Mannington by name, published in book form the best account in our language of the legion from within.

The force, it may be mentioned. dates back no further than the year 1831, when it was raised for service in the then newly-conquered colony of Algeria.

SEA FOOD.

A half-pound herring contains 45,000 eggs

The hog-lish, swimming down the cod's throat, kills its host and eats its way out.

Crabs and lobsters are said never to nip epileptics.

Sword-fish, though little eaten, is only excelled in delicacy by the far-famed fish of the Mediterranean.

Cuttle-fish (for India ink) are kept on farms and milked regularly like cows, in China.

Genuine Russian or, more properly, Astrakhan-caviar is in glob. ules almost as big as buckshot, and cost \$5 a pint.

liant. the 8,000 books in the prison library, and half a thousand more belonging to Chaplain Barnes. He reads in the original the works of Latin, French, German, Spanish, Italian and Arabic authors, having learned all these languages prison.

Besides reading, Pomeroy has one other pleasure the monthly visits of his mother. Mrs. Pomeroy. a broken and frail woman of close to eighty, who still lives in Weymouth, where Jesse was born, never misses a visit.

Every mother of a prisoned son thinks him innocent. But none believes it more devoutly than Mrs. Pomeroy.

'My son is a martyr,' she says. They told him that I was accused his crimes-that if he didn't conte s to them I would have to go to pri, in. He confessed to save mebeca se he loves me.

In answer to the charge that women cannot think on imperial questions, Mr. Forbes Robertson, speaking at Newcastle, said that if there had not been women voters in New Zealand we might not have had the offer of a Dreadnought

----BOGUS MISSING LINKS.

Several Have Been Exhibited in Various Countries.

The so-called "missing link which has been exhibiting at Ber lin, Vienna, and elsewhere on the Continent, turns out, as nught have been expected, to be a fraud That is to say, instead of its being a something between a human be ing and a monkey, it is just an or dinary negro baby whose body is covered with hair-a somewhat cur ious freak of Nature, but one which is not particularly uncommon.

It is strange, by the way, how

richly carved, gilded and decorated, this queer imposture crops up again and had a double bottom of boards: and again. Not more than a year Richard slept in it that might or so after Darwin's "Descent of After his defeat and death on Boss Man" first appeared, a "missing of the control of Man first appeared, a missing has turned up in New York, and who realized a fortune over the ven

England turn came in 1850 when Krao, Sthe monkey-maiden, was exhibited at the Westminster A million people paid to see her, and a great control versy raged in the Press concern

Professor Tyndall, however, who carefully examined her, pronounced her to be merely a somewhat pretty and exceedingly intelligent inttle Burmese girl, the only abnormality about her being the growth of fine, silky hair-so closely matted together as to almost resemble fur -which clothed her from head to foot like a garment made with hands.

As a matter of fact, the real miss ing links all disappeared off the earth some 150,000 years ago Neither were they pretty to look at or even interesting, being huge gorilla-like monsters, who walked with a slouching gait or on all fours -scientists are not agreed upon this point-and fought fiercely with the other scarcely more beast-like creatures who were their contemporaries.

____.W____ AN ANTI-TEETOTAL CHURCH.

The Rev. Fred. Kurtz, of Baltimore, formerly a Lutheran priest, has organized a church of a new dispensation. It is composed of about 10 liquor dealers, and uses a ritual similar to that of the Episcopalians. The affiliated dram-shop keepers support the church of Kurtz to aid the liquor interest and oppose adverse legislation.

The Bay of Quinte Methodist conference will be held in Bridge Street Methodist church, Belleville, commencing June 2nd. It is said that Rev. J. A. McCamus, Odessa, chairman of the conference board of examiners, will be the choice of many of the elerical and lay members of the conference for pre-sidency this year. He was secretary sidency this year. H of conference in 1900.

of his brother, Mr. Hugh Blain, "Bla-nayr", Deer Park. Dr. Blain had been ailing for about a year, but had been able to be around until a few days ago, when he was taken suddenly ill.

Mr. Blain was born in the town of Ayr, Scotland, in 1832, and came to Toronto with his parents when ten years old. He took his college course at the University of Toronto, chose the legal profession, and was one of the first who received the degree of L. L. D. from the Provincial University

He practised law in that city for several years, and was senior member of the firm of Blain, Ferguson & Parkinson, one of the then most prominent firms in Toronto. His work in connection with the law was chiefly in chancery, and his partner was afterwards made Judge Ferguson. During his active business life in Toronto Dr. Blain was connected with a number of financial institutions, including the Ontario cal institutions, including the ontario Loan Company, of which he was Presi-dent. He was also one of the prime movers in the organization of the To-ronto Electric Light Company. Decased retire from the practice of the law on account of ill-health. He afterwards, for a time, devoted him-self to political life and sat as member

self to political life and sat as member for West York in the Dominion House. a supporter of the Hon, Alex, Macken-zie, from 1873 to 1878, Although a Liberal in politics he believed in protection, and, indeed, was the mover of the first resolution in that direction in the House of Commons. Dr. Blain formed a warm friendship with Hon. George Brown, and also with Hon. Alexander Mackenzie. In 1878 he was defeated at the polls by the late Hon. N. Clarke Wallace, since when he had lived chiefly abroad on account of his health and had circled the globe. Blain had been at home for about a year before his death.

year before his death.

He married in 1869 Miss Eliza H.
Harrington, whose brother was one of
Foronto's leading wholesale merchants,
and who predeceased him by about
eighteen years. He leaves no children.
Messrs. Hugh and James W. Blain,
both of Toronto are brothers. The
funeral was private. Mr. Blain was a
brother-in-law of Mrs. J. S. Ham, Napanee.

METHODICAL BURGLARS.

The Ones John's Wife Was Sure She Heard Every Night.

There had been a number of burglaries in a certain suburban neighborhood, and the conversation at a small whist party turned naturally enough on burglars. Everybody had expressed an opinion except a quiet, elderly gentleman.

"Doesn't it make you nervous," somebody asked him, "to think every night when you go to bed that you may be burglarized before morning?"

"Oh, we don't mind them," said the elderly gentleman cheerfully, with a glance across the room at his wife. "We're too well used to them, aren't we, Mary?"
"John," said his wife warningly,

"don't be silly."

"Silly!" echoed he and turned to the thers. "Now, that's her modesty. others. Those burglars have been trying to go through our house every night for two weeks; always get in through the weeks; always get in through the dining room window too. But Mary hears them. Yes, sir, no sooner do they get through the window than Mary hears 'em and wakes me up. Fortunately for us, Mary is a very light sleeper."

"But it must be awful to wake up like that!" exclaimed one of the lis-

"Rather disturbing the first night," continued the speaker, "but not so bad after one gets used to it. All I have to do, you know, is to get up and lock the bedroom door, and then the burglars go right back out of the dining room window. Very methodical they are, too," added the elderly gentleman thoughtfully, "for they always lock the window after them."-Youth's Companion.

THE GIRAFFE.

Africa's Second Story Worker With the Long Distance Neck.

The giraffe is the second story worker of the animal kingdom. It is a merger of the zebra and the camel and is also a distant relative of the palm tree. The giraffe consists of eight feet of neck equipped with a body at one end and a head at the other. In the matter of neck it has all the rest of the animal kingdom beaten by a length. The giraffe's mouth is located so far from its stomach that it has to cat today to appease tomorrow's appetite. Many a giraffe has starved to death while the first meal it had eaten for two weeks was slowly traveling its transcontinental esophagus.

The giraffe looks as if it had started out to be a zebra, but, having reached the shoulders, had kept on going. It is ursday sidence, "Blaid been d been ys ago,

brewing concern in Bohemia offering to paint for the brewers "pictures suit able for advertising purposes-artistic, appropriate, attractive and cheap." He went on to say: "Sir John Millais was not above taking 40,000 marks from a soapmaker for one of his paintings to be used as an advertisement. Nor did he hesitate to offer other pictures for the same purpose at the same price. Why should not I, who owe my tailor and who fears to look my landlady in the face, not do the same? Stay! I shall do better. Am willing to take less than 40,000 marks for my best work."

Slow and Sure.

"How is my son getting along?" asked a parent of the headmaster of a school.

"He's slow and sure," was the response.

"That's satisfactory!"

"Not so," rejoined the master. "By it I mean that he is slow to learn and sure to forget."-London Telegraph.

The Practical One.

"All writers are not impractical, are they?"

"Oh, no! One man will write a joke and sell it for 50 cents. Another will write a comic opera around it and draw \$20,000 in royalties."-Louisville Courier-Journal.

Stomach Derangement.

Her Limbs Ached Worn Out-Tired Headaches, Dizziness.

Vitol Cured Her.

For years I have been a great sufferer. For years I have been a great subset.
Life to me was a burden, my limbs achied,
I always felt thred and worn out, had no
ambition. People could not sympathize
with me. Infact at times they imagined it was put on, or a matter of fancy with me, but one who suffered the same as I did me, out one who sumered the same as I did knows exactly what it means. I would work when I should be in bed. I was weak, seemed to be void of strength; life seemed to have left me to a certain extent. I have often felt as if I would give the world if I could feel buoyant and cheerful, really so. I often had to force what little theer fulness I did have. I was urged to try Vitol. and, my what a change; to-day I am the woman I used to try and picture. I am happy, cheerful and strong; it seems as if I had new nerves, in fact new life.

Mrs. R. Simms, Newcastle, Ont.

You may be strong and healthy, and buoyant if you will take Vitol. For sale everywhere. Price 50c box or 6 for \$2.50.

animal kingdom beaten length. The giraffe's mouth is located so far from its stomach that it has to eat today to appease tomorrow's appetite. Many a giraffe has starved to death while the first meal it had eaten for two weeks was slowly traveling its transcentinental esophagus.

The giraffe looks as if it bad started out to be a zebra, but, having deached the shoulders, had kept on going. It is very dark in color, marked by yellowish brown stripes in a bandsome linoleum pattern. It lives on tree tops, eagles' nests and rainbows. During the Boer war the British army had some difficulty with giraffes, which formed a great liking for war balloons and frequently nibbled them during their flight in order to inhale the gas.

Why does the giraffe have a long distance neck? Persons given to the use of common sense will fealize that Africa is rich in insect life as well as animal life and that all African animals carry innumerable parasites on. their hides. The giraffe's head is so far from his body that a long neck is absolutely necessary in order that he may reach down and grab off a tick from his fetlock when necessary. Even a child could see this - Collier's
